AGREEMENT

NOW, THEREFORE, for valuable consideration, the receipt and sufficiency of which is hereby acknowledged, and in consideration of the covenants and agreements set forth herein, Assignor and Assignee mutually agree as follows:

1. Definition. As used herein, the following term shall have the meanings set forth below:

1.1 Assigned Patents. The term "Assigned Patents" shall mean those patents and/or patent applications listed in Appendix A attached hereto and made a part hereof, as well as any and all patents maturing from a continuation, continuation-in-part, division, reissue, or reexamination of any Assigned Patents and regardless of whether such patent matures from a convention or non-convention application, or any other substitution, renewal, extension, addition, utility model, or other United States or foreign patent.

2. Assignment of the Assigned Patents. Subject to the terms, conditions, and limitations set forth herein, Assignor hereby assigns and transfers to Assignee, its successors, and assigns Assignor's entire rights, title, and interest in and to the Assigned Patents. The assignment of the Assigned Patents granted by Assignor to Assignee in this Agreement is granted free and clear of all security interests, liens, encumbrances, claims, or interests of any kind or nature.

3. Assignment of Accrued Enforcement Rights. Assignor hereby assigns and transfers to Assignee any and all claims or causes of action for infringement of any of the Assigned Patents that may have accrued prior to the effective date of this Assignment, together with the right to bring suit for and/or initiate any proceeding to collect any and all damages arising from said claims or causes of action.

4. Further Assurances. Assignor shall provide Assignee, its successors, and assigns, or their legal representatives, cooperation and assistance at Assignee's reasonable request and expense (including the execution and delivery of any and all affidavits, declarations, oaths, exhibits, assignments, powers of attorney, or other documentation as may be reasonably required): (i) in the prosecution and maintenance of the Assigned Patents; (ii) in the prosecution or defense of any interference, opposition, infringement, or other proceeding that may arise in connection with the Assigned Patents; and (iii) in the implementation or perfection of this Patent Assignment. Assignor agrees that he shall not assist or encourage, through action or inaction, any challenge to the validity, enforceability, or ownership of the Assigned Patents.

5. Representations and Warranties. Assignor expressly represents and warrants that: (i) Assignor has the sole and exclusive right to grant the assignment granted herein; (ii) to the best of its knowledge, no third party has any right, title, or interest in the Assigned Patents; (iii) Assignor has taken no action which may adversely affect Assignee's rights under this Patent Assignment; (iv) Assignor has not executed any assignments, sales, agreements, liens, mortgages, or encumbrances that conflict with the rights granted by this Patent Assignment; and (v) Assignor has the right to execute and enter into this Patent Assignment and to perform his obligations hereunder.

6. General Provisions.

6.1 Counterparts: Facsimile Signatures. This Assignment may be executed in two or more counterparts, each of which shall be deemed an original and all of which together shall constitute one document. This Assignment may be signed by facsimile, and facsimile signatures shall be binding, but the parties shall provide each other with originally signed copies of the Assignment as soon as possible thereafter.
