PATENT ASSIGNMENT

This Patent Assignment ("Patent Assignment"), dated as of March 13, 2020, is made by Allergan Pharmaceuticals International Limited, a private company limited by shares incorporated under the laws of Ireland and headquartered at Clonshaugh Business & Technology Park, Coolock, D17 E400, Dublin, Ireland ("Assignor"), and Allergan Therapeutics LLC, a Delaware limited liability company with its place of business at 5 Giralda Farms, Madison, New Jersey, 07940 USA ("Assignee"), pursuant to the Contribution Agreement between Assignee and Assignor, dated as of November 29, 2019 (the "Contribution Agreement").

WHEREAS, under the terms of the Contribution Agreement, Assignor has conveyed, transferred and assigned to Assignee, among other assets, certain intellectual property of Assignor, and has agreed to execute and deliver this Patent Assignment, for recording with the United States Patent and Trademark Office and corresponding entities or agencies in any applicable jurisdictions;

NOW THEREFORE, in consideration of the mutual covenants herein contained, and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties agree as follows:

1. Assignment. With effect from the Assignment Date, Assignor irrevocably conveys, transfers and assigns to Assignee, and Assignee hereby accepts, all of Assignor's right, title and interest in and to the following:

(a) the patents and patent applications set forth in Schedule 1 hereto and all issuances, divisions, continuations, continuations-in-part, reissues, extensions, reexaminations and renewals thereof (the "Assigned Patents");

(b) all rights of any kind whatsoever of Assignor accruing under any of the foregoing provided by applicable law of any jurisdiction, by international treaties and conventions and otherwise throughout the world;

(c) any and all royalties, fees, income, payments and other proceeds now or hereafter due or payable with respect to any and all of the foregoing; and

(d) any and all claims and causes of action with respect to any of the foregoing, whether accruing before, on or after the date hereof, including all rights to and claims for damages, restitution and injunctive and other legal and equitable relief for past, present and future infringement, misappropriation, violation, misuse, breach or default, with the right but no obligation to sue for such legal and equitable relief and to collect, or otherwise recover, any such damages.

2. Recordation and Further Actions. Assignor hereby authorizes the Commissioner for Patents in the United States Patent and Trademark Office and the officials of corresponding entities or agencies in any applicable jurisdictions, to record and register this Patent Assignment upon request by Assignee. Following the date hereof, at Assignee's sole cost and expense, Assignor and Assignee shall take such steps and actions, and provide such cooperation and assistance to Assignee and its successors, assigns and legal representatives, including the execution and delivery of any affidavits, declarations, oaths, exhibits, assignments, powers of attorney, or other documents, as may be advisable or necessary to effect, evidence or perfect the assignment of the Assigned Patents to Assignee, or any assignee or successor thereto.

3. Terms of the Contribution Agreement. The parties hereto acknowledge and agree that this Patent Assignment is entered into pursuant to the Contribution Agreement, including, without limitation, the

representations, warranties, covenants, exclusions and indemnities set forth therein, and that this Patent Assignment shall not be deemed to limit, enlarge or extinguish any obligation of the parties hereto under the Contribution Agreement, all of which obligations shall survive the delivery of this Patent Assignment in accordance with the terms of the Contribution Agreement. In the event of any conflict or inconsistency between the terms of the Contribution Agreement and the terms hereof, the terms of the Contribution Agreement shall govern.

4. Execution; Counterparts. This Patent Assignment may be executed in counterparts, each of which shall be deemed an original and all of which shall be deemed to constitute the same agreement. If any signature is delivered by email in PDF or similar electronic means, such signature shall create a valid and binding obligation of the party hereto executing (or on whose behalf the signature is executed) with the same force and effect as if such PDF signature were an original thereof.

5. Amendment. This Patent Assignment may not be amended except by an instrument in writing signed by each of the parties.

6. Descriptive Heading. The descriptive headings herein are inserted for convenience of reference only and are not intended to be part of or to affect the meaning or interpretation of this Patent Assignment.

7. Parties in Interest. This Patent Assignment shall be binding and inure to the benefit of each party and their respective successors and permitted assigns, and nothing in this Patent Assignment, express or implied, is intended to confer upon any other person any rights or remedies of any nature whatsoever under or by reason of this Patent Assignment.

8. Governing Law. This Patent Assignment shall be governed and construed in accordance with the internal laws of the State of New York without giving effect to any choice or conflict of law provision or rule (whether of the State of New York or any other jurisdiction) that would cause the application of laws of any jurisdiction other than those of the State of New York.

9. Extension; Waiver. Any party hereto may by an instrument in writing (a) extend the time for the performance of any of the obligations of the other party hereto or (b) waive compliance with any of the agreements of the other party hereto.
