ASSIGNMENT OF RIGHTS: PATENT APPLICATION
PATENT APPLICATION NO. 29/590169

I, Nathan Gregg Barr ("Assignor") am the owner of an invention known as a "Wallet Card State Bottle Opener" as described in U.S. Patent Application Number 29/590169, which was filed on January 8, 2017 (the "Patent Application"). In my capacity as owner of the Patent Application, I hereby assign all right, title and interest in the Patent Application to Caffeinate Labs, Inc. ("Assignee").

Therefore, for valuable consideration, the receipt of which is hereby acknowledged, Assignor hereby assigns to Assignee **100%** of his/her right, title, and interest in the invention and Patent Application, as well as all rights in any non-provisional, divisional, continuation, in whole or part, or substitute applications claiming priority to the Patent Application to Assignee for the entire term of any issued patent, reissue, or re-examination that may be granted. In addition, Assignee hereby assigns **100%** of his/her right, title, and interest in any foreign patent that may issue from foreign applications that are filed claiming priority to the Patent Application, as well as any divisional, continuation, in whole or part, or substitute applications, filed that claims priority to the Patent Application.

Assignor authorizes the United States Patent and Trademark Office to issue any patents resulting claiming priority to Patent Application to Assignee according to the percentage interest indicated in this assignment. The right, title and interest is to be held and enjoyed by Assignee and Assignee's successors and assigns as fully and exclusively as it would have been held and enjoyed by Assignor had this assignment not been made.

Assignor further agrees to: (a) cooperate with Assignee in the prosecution of the Application and foreign counterparts; (b) execute, verify, acknowledge and deliver all such further papers, including patent applications and instruments of transfer; and (c) perform such other acts as Assignee lawfully may request to obtain or maintain any patents claiming priority to the Patent Application for the invention in any and all countries.
