PATENT ASSIGNMENT

THIS PATENT ASSIGNMENT (this "Assignment") is made and delivered as of February 28, 2014 (the "Effective Date") by **DACHIS CORPORATION D/B/A DACHIS GROUP**, a Delaware corporation (the "Assignor"), for the benefit of **SPRINKLR, INC.**, a Delaware corporation (the "Assignee"). All capitalized terms used herein but not otherwise defined shall have the meanings given them in the Agreement (as defined below).

WHEREAS, Assignor and Assignee have entered into a certain Asset Purchase Agreement, dated as of February 19, 2014 (the "Agreement");

WHEREAS, Assignor owns all right, title and interest in, to and under the patents and/or patent applications listed on Schedule A (hereinafter, collectively the "Inventions"); and

WHEREAS, pursuant to the Agreement, Assignee is acquiring Assignor's business in connection with which the Inventions are intended to be used and is desirous of obtaining from Assignor, and Assignor wishes to transfer and assign to Assignee, all right, title and interest in and to said Inventions.

NOW, THEREFORE, in consideration of the foregoing, as well as other good and valuable consideration the receipt and adequacy of which is hereby freely acknowledged, and intending to be legally bound, Assignor does hereby irrevocably sell, assign and transfer unto said Assignee, its successors, assigns and legal representatives, Assignor's entire right, title and interest in and throughout the United States of America (including its territories and dependencies) and all countries foreign thereto in and to said Inventions including any United States patent application(s), provisional, divisional, renewal, substitute, continuation, reexamination and reissue applications, based in whole or in part on the Inventions, any foreign applications, including international and regional applications, based in whole or in part on any of the aforesaid United States applications or in whole or in part on said Inventions, in and to any and all letters patent, including extensions thereof, of any country which have been or may be granted on any of the aforesaid applications or on said Inventions or any part(s) thereof, and in and to any right to claim priority to any of the aforesaid patents and/or patent applications, any and all royalties, fees, income, payments and other proceeds now or hereafter due or payable with respect to the Inventions, and the right to sue for past infringements and unauthorized uses of the Inventions;

AND ASSIGNOR hereby agrees for itself and any successors or assigns, until one year following the Closing, to execute without further consideration any further documents and instruments which may be reasonably necessary, lawful and proper in the preparation or prosecution of any continuing, substitute, divisional, renewal, reexamination or reissue application or in any amendments, extensions or interference proceedings, or other applications for patents of any region or country, that may be reasonably necessary to secure to Assignee its interest and title in and to said Inventions or any part(s) thereof, and in and to said several patents or any of them;

AND ASSIGNOR hereby acknowledges that: (a) the terms of the Agreement, including, but not limited to, the representations, warranties, covenants, agreements and indemnities relating to the Inventions are incorporated herein by this reference, (b) the representations, warranties, covenants, agreements and indemnities contained in the Agreement shall not be superseded hereby but shall remain in full force and effect to the full extent provided therein, and (c) in the event of any conflict or inconsistency between the terms of the Agreement and the terms hereof, the terms of the Agreement shall govern.
