This PATENT ASSIGNMENT AGREEMENT ("Agreement") is made and entered into as of September 29, 2017 ("Effective Date") by and between MATTHEWS RESOURCES, INC., a Delaware corporation ("Assignor"), and MATTHEWS INTERNATIONAL CORPORATION, a Pennsylvania corporation ("Assignee"). Capitalized terms used but not defined herein shall have the meanings set forth in the Agreement (as defined below).

WHEREAS, Assignee and Assignor have entered that certain Intellectual Property Assignment Agreement dated September 29, 2017 (the "Intellectual Property Assignment Agreement") pursuant to which Assignor transferred, assigned, conveyed, granted and delivered to Assignee and Assignee accepted from Assignor all of its Intellectual Property, including the Assignor's rights, title and interest in and to the Patent Rights as defined in the Intellectual Property Assignment Agreement.

NOW THEREFORE, in consideration of the mutual covenants set forth herein, and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, and intending to be legally bound, the parties hereby represent, covenant and agree as follows:

1. Defined Terms. Capitalized terms used but not otherwise defined herein shall have the meanings given to them in the Agreement.
2. Assignment. Assignor does hereby irrevocably sell, assign, transfer, convey, grant and set over unto Assignee, its legal representatives, successors, and assigns, and Assignee does hereby accept such assignment, transfer, conveyance, grant and set over, of Assignor's entire right, title and interest in and to the Patent Rights, including (i) the national, regional and international patents and patent applications, including provisional patent applications, set forth on Schedule A attached hereto, (ii) any and all patent applications filed either from such patents, patent applications or provisional applications or from an application claiming priority from any of these, including divisionals, continuations, continuations-in-part, substitutions, provisionals, converted provisionals, and continued prosecution applications, (iii) any and all patents that have issued or in the future issue from the patents and patent applications described in clauses (i) and/or (ii), including utility models, petty patents and design patents and certificates of invention and (iv) any and all extensions or restorations by existing or future extension or restoration mechanisms, including revalidations, reissues, re-examinations, supplemental examinations, inter partes reviews, post-grant reviews, covered business method reviews, oppositions and other existing or future post-issuance proceedings, and extensions (including future pending or issued unexpired patent term extension or supplemental protection certificate or equivalent extension right) of the patents or patent applications described in the foregoing clauses (i), (ii) and/or (iii); (v) any and all letters patent in the United States and all foreign countries which may be granted therefore and thereon; and (vi) all rights under the International Convention for the Protection of Industrial
