This Assignment encompasses the Invention(s) and the Patent Application as well as any patent application that claims the benefit of the priority date of the Patent Application under United States law or international convention and the invention(s) described therein, such applications including, but not limited to, any application filed under the Patent Cooperation Treaty (a "PCT Application"), any application entering the national phase from the Patent Application or a PCT Application, any utility application or continuation thereof, including any continuation-in-part or divisional application, any patent application or patent issuing thereon subjected to a reinstatement, renewal, reissue or reexamination process, any patent application or patent issued thereon deemed an extension or substitution of the Patent Application or any of the foregoing applications, and any patent, including any Letters Patent, that issues from any of the foregoing applications or claims or has the right to claim priority thereto. This Assignment conveys to Assignee, its successors and assigns, the full right to claim all benefits and priority rights under any applicable law, convention, or treaty, including the right to sue for injunctive relief or damages caused by past infringement or any other cause of action accruing prior to this Assignment. The inventions, patent applications and patents referenced herein are to be held and enjoyed by the Assignee for its own use and behalf and for its successors and assigns until the full end of the term(s) for which any patent(s) may be granted as fully and entirely as if the same would have been held by me had this Assignment not been made.

I hereby acknowledge that this Assignment carries with it the right by Assignee to apply for and obtain from competent authorities in all countries of the world any and all Letters Patent by attorneys and agents of Assignee's selection and the right to procure the grant of all Letters Patent to Assignee in its own name. I hereby authorize and request the Director of the United States Patent and Trademark Office and the empowered officials of all other governments to issue Letters Patent as described herein upon the Patent Application or any application(s) based thereon, to the Assignee, its successors, or assigns.

I hereby agree, when requested, and without further consideration, to execute all oaths, assignments, powers of attorney, declarations, and any other papers necessary or desirable to fully secure to the Assignee the rights, titles and interests conveyed by this Assignment and to fully communicate to the Assignee all known facts relating to the Invention(s). I further agree to assist the Assignee by providing statements or testimony in any proceeding in which the Invention(s) may be involved, for consideration to be negotiated as need be and in good faith.

I represent that I have not made and will not make any assignment, grant, mortgage, license or other agreement that conflicts with the terms and covenants of this Assignment.
