EXHIBIT D

PATENT ASSIGNMENT

This Patent Assignment (this "Patent Assignment") is delivered under that certain IP Asset Sale and Assignment Agreement dated as of September 10, 2017 (the "Assignment Agreement"), by and between Cool Dry, Inc., a Delaware corporation ("Assignor") and LG Electronics, Inc., a corporation organized under the laws of the Republic of Korea ("Assignee").

For good and valuable consideration, receipt of which the Assignor hereby acknowledges, and by signing and delivering this instrument, the Assignor hereby sells, assigns, transfers, conveys, and delivers to the Assignee, its successors, legal representatives, and assigns all of the Assignor's right, title, and interest in and to:

(a) the patents and patent applications specifically listed in Annex A to this Patent Assignment (such patents, "said patents," and such patent applications, "said patent applications"), as well as any and all inventions disclosed in those patents and patent applications (such inventions, "said inventions"); and

(b) all of the properties and rights with respect to each of the said patents, said patent applications, and said inventions, including without limitation the following properties and rights:

(1) any patents in the United States and anywhere else in the world and patent applications that have been granted or filed, respectively including without limitation all foreign patents and patent applications that claim priority based on and/or corresponding to the said patents and said patent applications,

(2) the right to file applications based on said inventions,

(3) all counterparts, divisions, renewals, reissues, reexaminations, continuations, continuations-in-part, and term extensions of any kind of the foregoing patents and patent applications in clauses (1) and (2) above,

(4) the right to recover damages, including provisional or other royalties, for prior infringements of said patents and said patent applications, and

(5) all rights under the Hague Convention, the Paris Convention for the Protection of Industrial Property, and under the Patent Cooperation Treaty, the same to be held and enjoyed by the Assignee, for its own use and behalf and the use and behalf of its successors, legal representatives, and assigns, to the full end of the term or terms for which patents may be granted as fully and entirely as the same would have been held and enjoyed by the Assignor had this sale and assignment not been made.

The undersigned has signed this Patent Assignment on September 10, 2017.
