## ASSIGNMENT OF PATENTS

Assignment of Patents is from Snapper, Inc., a Georgia corporation ("Assignor"), to Snapper Products, Inc., a Delaware corporation ("Assignee"), and is effective as of the 21<sup>st</sup> day of November 2002.

For good and valuable consideration, the receipt and sufficiency of which Assignor hereby acknowledges, Assignor hereby sells, assigns and transfers to Assignee its successors, assigns and legal representatives, the entire right, title and interest for the United States and its territorial possessions and in all foreign countries, including all rights to claim priority, in and to the Letters and Design Patents and applications for same set forth on Exhibit A (the "Patents"), and in and to any legal equivalent thereof in a foreign country, including the right to claim priority, and any and all letters or design patent of foreign countries which may be or have been issued on the inventions disclosed in the Patents, all divisions, reissues and continuations thereof, and all inventions disclosed therein, together with all claims for damages by reason of past or future infringement, with the right to sue for and collect the same for the use and benefit of the Assignee and its successors and assigns.

Assignor represents and warrants to Assignee that Assignor: (i) was the sole owner of all rights, title and interest in the Patents, (ii) has not assigned, transferred, licensed, pledged or otherwise encumbered the Patents, (iii) has full power and authority to enter into this Assignment and to make the assignment set forth herein, (iv) is not aware of any violation, infringement or misappropriation of any third party's rights (or any claim thereof) by the Patents, and (v) is not aware of any questions or challenges with respect to the patentability or validity of any claims of any existing patents or patent applications relating to the Patents.

Assignor agrees to assist Assignee in every legal way to evidence, record and perfect this assignment and to apply for and obtain recordation of and from time to time enforce, maintain, and defend the assigned rights. If Assignee is unable for any reason whatsoever to secure Assignor's signature to any document it is entitled to under this Assignment, Assignor hereby irrevocably designates and appoints Assignee and its duly authorized officers and agents, as his agents and attorneys-in-fact with full power of substitution to act for and on his behalf and instead of Assignor, to execute and file any such document or documents and to do all other lawfully permitted acts to further the purposes of the foregoing with the same legal force and effect as if executed by Assignor. Assignor covenants that Assignee will, upon Assignee's request, be provided promptly with all pertinent facts and documents relating to said invention and said Patents and legal equivalents as may be known and accessible to Assignor and will testify as to the same in any interference litigation or proceeding related thereto.

IN WITNESS WHEREOF, Assignor has executed this Agreement as of the date first written above.
