**PATENT ASSIGNMENT**

This **Patent Assignment Agreement** (the "**Patent Assignment**") is made and entered into as of June 26, 2020 (the "**Effective Date**") by and between Les Laboratoires Servier, a corporation organized and existing under the laws of France, registered on the Trade and Companies Register of Nanterre under No. 085 480 796, with its head office at 50 rue Carnot, 92284 Suresnes cedex, France, (the "**Assignor**") and ARMGO Pharma, Inc., 923 Saw Mill River Rd, PMB #260, Ardsley, NY 10502, a Delaware corporation (the "**Assignee**"). Assignee and Assignor are sometimes referred to herein individually as a "**Party**" and collectively as the "**Parties**".

**WHEREAS**, Assignor is the sole owner or co-owner, with Assignee, of the Assigned Patents and, as of the Effective Date and pursuant to the terms hereof, Assignor wishes to assign to Assignee, and Assignee wishes to assume, all of Assignor's right, title and interest in and to the patents and patent applications set forth on **Schedule I** attached hereto, including all inventions and discoveries disclosed or claimed therein or encompassed thereby, statutory invention registrations, revisions, extensions, divisionals, continuations, continuations-in-part, extensions, reexaminations, reissues and foreign applications and patents relating thereto (collectively, the "**Assigned Patents**").

**NOW, THEREFORE**, in consideration of the terms and conditions herein and for other good and valuable consideration furnished by Assignee to Assignor, the receipt and sufficiency of which are hereby acknowledged by the Parties:

1. As of the Effective Date, Assignor hereby assigns, transfers, sells and conveys to Assignee, its successors and assigns, all of Assignor's right, title, and interest in and to the Assigned Patents, together with all inventions and discoveries disclosed or claimed therein or encompassed thereby, statutory invention registrations, revisions, extensions, divisionals, continuations, continuations-in-part, extensions, reexaminations and reissues relating thereto, and any applications filed and/or granted in foreign countries and all other corresponding rights that are or may be hereafter secured under the laws of any country, now or hereafter in effect, for Assignee's own use and enjoyment, and for the use and enjoyment of Assignee's successors, assigns or other legal representatives, as fully and entirely as the same would have been held and enjoyed by such Assignor if this Patent Assignment had not been made, including all right, title and interest in and to all income, proceeds, royalties, damages, claims and payments which accrue, or have accrued, prior to and as of the Effective Date or thereafter and are due or payable after the Effective Date with respect thereto, and in and to all causes of action, either at law or in equity, for any past, present or future infringement of the Assigned Patents, or other violation or unauthorized use of the Assigned Patents, with the right to sue for, and collect the same.

2. Assignor authorizes and requests the Commissioner of Patents and Trademarks of the United States of America and the corresponding empowered officials of all other governments to issue or transfer the Assigned Patents to Assignee, as assignee of the entire right, title, and interest therein or otherwise as Assignee may direct.

3. The Parties acknowledge and agree that certain documents may need to be executed and delivered by Assignor to effectuate transfer of title to the Assigned Patents to Assignee. Assignor agrees to provide to Assignee and Assignee's successors, assigns or other legal representatives, all such cooperation and assistance (including, without limitation, the execution

and delivery of any affidavits, declarations, oaths, exhibits, assignments, powers of attorney or other documentation), reasonably requested by Assignee to more fully and effectively effectuate the purposes of this Patent Assignment, at Assignee's sole expense.

4. As from the Effective Date, Assignee shall be responsible for filing, prosecuting and maintaining of all the Assigned Patents at its own costs and expenses.

5. Assignor hereby represents and warrants to Assignee:

(a) except for Assignee's interest in the Assigned Patents co-owned with Assignor, Assignor exclusively owns all right, title and interest in and to all of the Assigned Patents free and clear of any liens or encumbrances and Assignor has the exclusive right to assign, sell, license, or otherwise transfer all right, title and interest to the Assigned Patents;

(b) Assignor has not transferred, assigned or otherwise granted any right, license or interest in or to any of the Assigned Patents to any third party and no third party has any interest in and to the Assigned Patents;

(c) the US Patent and Trademark Office records and all corresponding foreign patent office records for the Assigned Patents correctly reflects the actual owner or owners of the Assigned Patents; and

(d) Assignor has the ability to enter into this Patent Assignment and assign the rights granted herein without violation of any law, regulation or any agreement with any third party.

6. Each provision of this Patent Assignment will be interpreted in such a manner as to be effective and valid under applicable law, but if any term or other provision of this Patent Assignment is held to be invalid, illegal or unenforceable under applicable law, all other provisions of this Patent Assignment shall remain in full force and effect.

7. This Patent Assignment may be executed in counterparts, each of which will be deemed an original, but all of which together constitute one and the same original. This Patent Assignment may not be amended except by an instrument in writing signed by each of the Parties hereto.

8. This Patent Assignment shall be governed by the laws of France, exclusive of its choice of law and conflict of law rules. The Parties acknowledge and agree that the United Nations Convention on Contracts for the International Sale of Goods shall not apply.
