ASSIGNMENT

Whereas, Nissan North America, Inc., a corporation of California, having its place of business at One Nissan Way, Franklin, Tennessee 37067 ("Assignor"), is the owner of the entire right, title and interest in and to the US Patent Applications and PCT Applications listed in the attached Schedule A ("Patent Applications").

Whereas, Renault S.A.S., a corporation organized under the laws of France, having a place of business at 13-15 Quai Le Gallo, 92100 Boulogne-Billancourt, France ("Assignee"), desires to obtain an undivided one-half of the right, title and interest in and to the Patent Applications.

Now, therefore, in consideration of the good and valuable consideration received by Assignor from Assignee, the receipt and sufficiency of which is hereby acknowledged, Assignor hereby assigns and transfers to Assignee an undivided one-half of its right, title and interest in the Patent Applications (as well as such rights in any divisions, continuations in whole or part, or substitute applications) to Assignee for the entire term of the issued Patents and any reissues or extensions that may be granted and for the entire terms of any and all foreign patents that may issue from foreign applications (as well as divisions, continuations in whole or part, or substitute applications) filed claiming the benefit of the Patent Applications, as well as the right to claim for any of said applications the full benefits and priority rights under the International Convention and any other international agreement to which the United States adheres.

Assignor authorizes the United States Patent and Trademark Office to issue any Patents resulting from the Patent Applications to Assignee according to the percentage interest indicated in this assignment. The right, title, and interest are to be held and enjoyed by Assignee and Assignee's successors and assigns as fully and exclusively as it would have been held and enjoyed by Assignor had this assignment not been made.

Assignee and Assignor agree to: (a) cooperate in the prosecution of the Patent Applications and foreign counterparts; (b) execute, verify, acknowledge, and deliver all such further papers, including patent applications and instruments of transfer; and (c) perform such other acts as may lawfully be necessary to obtain or maintain the Patent Applications and resulting patents in any and all countries.

Assignor retains an undivided one-half ownership rights in the Patent Applications, the patents, the inventions, and the rights transferred to Assignee hereunder.

In witness whereof, Assignor has caused this Assignment to be executed by its duly authorized representative.
