PATENT ASSIGNMENT AGREEMENT

This PATENT ASSIGNMENT AGREEMENT (“**Patent Assignment**”), dated as of July 8, 2020, is made by Scanmen, Ltd., a Hong Kong Company, and Vehicle Hail Scan Systems, LLC, a Pennsylvania limited liability company (together, “**Seller**”), in favor of Vehicle Service Group, LLC, a Delaware limited liability company (“**Buyer**”), the purchaser of certain assets of Seller pursuant to an Asset Purchase Agreement between Buyer, Seller, Robert Finkle, Richard Adelman, Denise Bartels, Aivaras Grauzinis and Geert Willems, dated as of July 8, 2020 (the “**Asset Purchase Agreement**”).

WHEREAS, under the terms of the Asset Purchase Agreement, Seller has conveyed, transferred, and assigned to Buyer, among other assets, certain intellectual property of Seller, and has agreed to execute and deliver this Patent Assignment, for recording with the United States Patent and Trademark Office and corresponding entities or agencies in any applicable jurisdictions;

NOW THEREFORE, the parties agree as follows:

1. Assignment. For good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Seller hereby irrevocably conveys, transfers, and assigns to Buyer, and Buyer hereby accepts, all of Seller’s right, title, and interest in and to the following (the “**Assigned Patents**”):

(a) the patents and patent applications set forth in Schedule I hereto and all issuances, divisions, continuations, continuations-in-part, reissues, extensions, reexaminations, and renewals thereof (the “**Patents**”);

(b) all rights of any kind whatsoever of Seller accruing under any of the foregoing provided by applicable law of any jurisdiction, by international treaties and conventions, and otherwise throughout the world;

(c) any and all royalties, fees, income, payments, and other proceeds now or hereafter due or payable with respect to any and all of the foregoing; and

(d) any and all claims and causes of action with respect to any of the foregoing, whether accruing before, on, or after the date hereof, including all rights to and claims for damages, restitution, and injunctive and other legal and equitable relief for past, present, and future infringement, misappropriation, violation, misuse, breach, or default, with the right but no obligation to sue for such legal and equitable relief and to collect, or otherwise recover, any such damages.

2. Recordation and Further Actions. Seller hereby authorizes the Commissioner for Patents in the United States Patent and Trademark Office and the officials of corresponding entities or agencies in any applicable jurisdictions to record and register this Patent Assignment upon request by Buyer. Following the date hereof, Seller shall take such steps and actions, and provide such cooperation and assistance to Buyer and its successors, assigns, and legal representatives, including the execution and delivery of any affidavits, declarations, oaths, exhibits, assignments, powers of attorney, or other documents, as may be reasonably necessary to effect, evidence, or perfect the assignment of the Assigned Patents to Buyer, or any assignee or successor thereto.

3. Terms of the Asset Purchase Agreement. The parties hereto acknowledge and agree that this Patent Assignment is entered into pursuant to the Asset Purchase Agreement, to which reference is made for a further statement of the rights and obligations of Seller and Buyer with respect to the Assigned Patents. The representations, warranties, covenants, agreements, and indemnities contained in the Asset Purchase

Agreement shall not be superseded hereby but shall remain in full force and effect to the full extent provided therein. In the event of any conflict or inconsistency between the terms of the Asset Purchase Agreement and the terms hereof, the terms of the Asset Purchase Agreement shall govern.

4. Counterparts. This Patent Assignment may be executed in counterparts, each of which shall be deemed an original, but all of which together shall be deemed one and the same agreement. A signed copy of this Patent Assignment delivered by facsimile, e-mail, or other means of electronic transmission shall be deemed to have the same legal effect as delivery of an original signed copy of this Patent Assignment.

5. Successors and Assigns. This Patent Assignment shall be binding upon and shall inure to the benefit of the parties hereto and their respective successors and assigns.

6. Governing Law. This Patent Assignment shall be governed by and construed in accordance with the internal laws (as opposed to the conflicts of law provisions) of the State of Delaware, without regard to the conflicts of law rules of such state. All actions, claims, lawsuits or similar arising out of or relating to this Patent Assignment shall be heard and determined exclusively by the Delaware Court of Chancery. Consistent with the preceding sentence, each of the parties hereby (a) submits to the exclusive jurisdiction of such court for the purpose of any actions, claims, lawsuits or similar arising out of or relating to this Patent Assignment brought by any party hereto; (b) agrees that service of process will be validly effected by sending notice in accordance with Section 9.3 of the Asset Purchase Agreement; and (c) irrevocably waives, and agrees not to assert by way of motion, defense, or otherwise, in any such actions, claims, lawsuits or similar, any claim that it is not subject personally to the jurisdiction of the above-named court, that its property is exempt or immune from attachment or execution, that the action, claim, lawsuit or similar is brought in an inconvenient forum, that the venue of the action, claim, lawsuit or similar is improper, or that this Patent Assignment or the transactions contemplated by this Patent Assignment may not be enforced in or by any of the above named court.
