ASSIGNMENT OF RIGHTS: PATENT APPLICATION

Inventors/Assignors: James A. Carson; Susan H. Glenn-Joseph; Ryuta Richard Makino are owners of "Dynamic blockchain system and method for providing efficient and secure distributed data access, data storage and data transport", as described in the U.S. Patent and Trademark office Application Number: 16/438,188, filed June 11, 2019, (the "Patent Application") . Dynamic Blockchains Inc ("Assignee") desires to acquire all rights in and to the Patent Application and the patent (and any reissues or extensions) that may be granted.

Therefore, for valuable consideration, the receipt of which is acknowledged, Assignors assign to Assignee 100% of each of his or her right, title, and interest in the invention and Patent Application (as well as such rights in any divisions, continuations in whole or part, or substitute applications) to Assignee for the entire term of the issued Patent and any reissues or extensions that may be granted and for the entire terms of any and all foreign patents that may issue from foreign applications (as well as divisions, continuations in whole or part, or substitute applications) filed claiming the benefit of the Patent Application.
