- (c) all past, present and future remedies for damages and profits,

as related to the Patents, future developments in the Patents, and any and all applications or patents based on or arising from the Patents or future developments of the Patents, including the Issued Patent, the First Patent Application, and the Second Patent Application, to be held and enjoyed by the Assignee as fully and entirely as the same would be held and enjoyed by the Assignor if this assignment and sale had not been made.

To the extent not granted, assigned, sold or transferred to the Assignee by the above and for the good and valuable consideration acknowledged above, the Assignor agrees to and does hereby grant, assign, sell and transfer unto the Assignee all of Assignor's interest in the Patents, including any and all future developments and improvements in the Patents immediately and automatically upon existence.

The Assignor hereby COVENANTS AND WARRANTS that the Assignor has not executed and shall not execute any writing or perform any act whatsoever conflicting with this Assignment. This covenant and warranty includes, but is not limited to, a representation to the Assignee that no grant, assignment, sale, transfer, mortgage, license, encumbrance or other agreement affecting any portion, in whole or in part, of the Patents has been made to any party by the Assignor, and that the full right and authority to convey the Patents as herein expressed is possessed by the Assignor.

The Assignor hereby agrees that the Assignor will, in view of the good and valuable consideration acknowledged above, perform the following as relating to the Issued Patent, the First Patent Application, the Second Patent Application, and the portions of any and all applications or patents based on or arising from the Issued Patent, the First Patent Application, and the Second Patent Application in all countries, United States and foreign, and under any applicable treaty or convention:

- (1) communicate any and all facts and information known to the Assignor respecting the Patents to the Assignee and the Assignee's affiliates, legal representatives and successors;

- (3) testify in any legal or quasi-legal proceedings regarding any and all facts known to the Assignor related to the Patents as requested by the Assignee and the Assignee's affiliates, legal representatives and successors;
- (4) act in the benefit of the Assignee, including not engaging in any acts resulting in intentional or unintentional waiver of attorney-client privileges, as relating to the Patents without express written authorization by the Assignee, and, if there is a waiver of attorney-client privileges, assert any partial waiver of attorney-client privileges does not constitute a total waiver of attorney-client privileges; and
- (5) generally do everything reasonable to aid in securing, maintaining and enforcing proper protection for the Patents in the Assignee and the Assignee's affiliates, legal representatives and successors.

This Assignment embodies the complete and final agreement between the Parties on this subject and shall be governed and controlled as to validity, enforcement, interpretation, constructions, effect and in all other respects by the laws of the United States, and in particular in accordance with the laws of the State of Wisconsin, without reference to the conflict of laws principles thereof. It is further understood that Assignor and Assignee consent to the courts of Wisconsin in connection with any dispute arising under the Agreement.
