Whereas, Edwards Lifesciences Corporation ("Edwards") owns certain new and useful improvements entitled:

\*\*\*

☒ Growth Stent For Congenital Narrowings was submitted on September 4, 2018,  
as invention record Number 9690.

☐ for which an application for a United States Letters Patent is filed herewith.

Now therefore, in consideration of one dollar (\$1.00) and other good and valuable consideration, the receipt and sufficiency whereof are hereby acknowledged, Edwards hereby conveys, transfers and assigns to Renata Medical, Inc. (hereinafter referred to as "assignee"), a Delaware corporation, its successors, legal representatives and assigns, the entire right, title and interest throughout the world in the above-mentioned invention or improvements, in the above-mentioned invention record, including any and all patent applications for United States Letters Patent and applications in any other countries which assignee may file, either solely or jointly with others, on said invention or improvements, including any divisional, continuation and continuation in part applications, and in any and all Letters Patent of the United States or of any other country which may be obtained on any of said applications, and in any reissue, reexam or extension thereof.

We hereby authorize and request the Commissioner of Patents to issue said Letters Patent to assignee. We hereby authorize and request the attorneys of record in any applicable application to insert in this Assignment the date and serial number of any application when officially known.

Edwards warrants itself to be the owner of the interest herein assigned and to have the right to make this assignment; and further warrants that there are no outstanding prior assignments, licenses, or other rights in the interest herein assigned from Edwards to any other person.

Assignee agrees and hereby grants Edwards an irrevocable, non-transferable, non-exclusive license to the invention record and all related issued patents, foreign and domestic, to make, have made, use, and sell products and services in the heart valve field for any use, and in the field of cardiovascular devices for non-pediatric uses. The non-exclusive license contemplated by the previous sentence, including all applicable terms and conditions associated therewith, shall be separately documented pursuant to a written license agreement to be executed by and between assignor and assignee.

For said consideration Edwards hereby agrees, upon the request and at the expense of said assignee, its successors, legal representatives and assigns, to execute any and all divisional, continuation, and C-I-P applications for said invention or improvements, and any necessary oath or supplemental oath or affidavit relating thereto, and any application for the reissue, reexam or extension of any Letters Patent that may be granted upon said application that said assignee, its successors, legal representatives and assigns may deem necessary or expedient. For said consideration Edwards further agrees, upon the request of said assignee, its successors, legal representatives and assigns, in the event of said application or any division, continuation, or C-I-P thereof, or Letters Patent issued thereon, or any reexam, reissue or application for the reissue thereof becoming involved in interference, to cooperate to the best of our ability with said assignee, its successors, legal representatives and assigns in the matters of preparing and executing the preliminary statement and giving and producing evidence in support thereof.

Edwards hereby further agrees to perform, upon such request, any and all affirmative acts to obtain Letters Patent, and vest all rights therein hereby conveyed in said assignee, its successors, legal

representatives and assigns whereby said Letters Patent will be held and enjoyed by said assignee, its successors, legal representatives and assigns to the end of the term for which said Letters Patent may be granted as fully and entirely as the same would have been held and enjoyed by us if this assignment and sale had not been made, including the right to enforce said patent and to sue for and recover damages and all other remedies arising out of any and all past, present and future infringement or violation of said Letters Patent, and for said considerations we hereby also assign to said assignee, its successors, legal representatives and assigns the entire rights, title and interest in said invention or improvements for any and all foreign countries and the right of priority for patent and utility model applications in all countries arising under any applicable international convention for the protection of industrial property and/or any internal priority legislation of such countries, and we further agree upon the request of said assignee, its successors, legal representatives and assigns to execute any and all documents that shall be required to be executed in connection with any and all applications for foreign Letters Patent therefor, including the prosecution thereof, and to execute any and all documents necessary to invest title in said foreign applications and patents in said assignee.
