### ASSIGNMENT AGREEMENT

Rea Huntley, James Bagley and Marcus Gunn (“the Inventors”), have filed U.S. Patent Application No. 16/930,490 directed to CONTACTLESS LOCKER SYSTEM AND METHOD (“the Invention”); and

Lavii, Inc. (“the Assignee”) seeks to acquire an interest in the Invention and in all foreign and domestic patents and patent applications, including divisions, continuations, reissues, substitutions, and extensions thereof, directed to the Invention (“the Intellectual Property”);

For good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Inventors sell, assign, and transfer to the Assignee, its successors and assigns, the full and exclusive right to the Intellectual Property.

The Inventors authorize and request the Patent Office officials in the United States and any and all foreign countries to issue any and all patents directed the Invention, when granted, to the Assignee for the sole use of the Assignee and its successors and assigns.

Further, the Inventors declare that they are the sole and lawful owners of the entire right, title, and interest in and to the rights assigned in connection with the Invention and with the above-identified patent application, and that the same are unencumbered. The Inventors declare that they have full right and lawful authority to sell and convey the same in the manner herein set forth.

Further, the Inventors agree that they will communicate to the Assignee, or its representatives, any facts known respecting the Invention, and to testify in any legal proceedings, sign all lawful papers, execute all divisional, continuation, reissue, substitution, and extension applications, execute all necessary assignment papers to cause any and all of patents directed to the Invention to be issued to the Assignee, to make all rightful oaths, and to generally do everything possible to aid the Assignee, and its successors and assigns, to obtain and enforce proper protection for the Invention in the United States and in any and all foreign countries.
