claim priority thereto, and any reexamination and reissue applications thereof; all international, regional, and foreign applications, including registered Community Designs and unregistered Community Design Rights, that claim priority to, are counterparts of, or otherwise correspond thereto, including applications listed in Exhibit A; the design patent(s) in the United States and corresponding industrial design registrations and unregistered design rights in countries or regions foreign thereto, that may or shall issue or have issued therefrom; any extensions, substitutes, or renewals thereof; the right to claim priority to the filing date of the Design Application; any right, title, or interest in and to the Design and the Design Application under any international conventions; and any and all rights to collect damages for past, present, or future infringement of any U.S. or foreign patent or industrial design registration rights in the Design which may be, shall be, or have been granted (collectively "the Design Rights"); and

Assignor further authorizes Assignee, its successors, and assigns, or anyone they may properly designate, to apply for a design patent in the U.S. and corresponding design registrations in any and all foreign countries and regions, in its own name if desired, and otherwise take advantage of the provisions of any international conventions; and

Assignor hereby authorizes and requests transfer of the Design Application and any further applications, including applications listed in Exhibit A, which may be or shall have been filed under the Design Rights, to Assignee in accordance herewith and further authorizes and requests any official of any State whose duty consists of issuing design registrations or other evidence or forms of any industrial property protection issuing from the Design Application and all related applications, including applications listed in Exhibit A, to issue same to Assignee, its successors, and assigns in accordance herewith; and

Assignor hereby authorizes Assignee, its successors and assigns, or anyone they may properly designate, to insert in this instrument the application number and filing date of the Design Application, and to insert in Exhibit A the application number(s) and filing date(s) of application(s) that claim priority to, are counterparts of, or otherwise correspond to the Design Application, once known.
