**WHEREAS**, Assignee is desirous of acquiring the entire right, title and interest in and to the said invention, the said application, all inventions disclosed in said application and any and all Letters Patent of the United States which may be granted for the said invention or inventions, or any of them.

**NOW, THEREFORE**, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Assignor does hereby sell, assign, transfer, convey and set up over to Assignee, its successors, assigns and other legal representatives, the entire right, title and interest in and to the Patent, for the United States, including any present and future continuations, divisions, continuations-in-part, reissues, reexaminations and extensions, any foreign equivalents or counterparts thereof, and including without limitation the subject matter of all causes of action, claims, demands or other rights which may be obtained therefrom for Assignee's own use and enjoyment, and for the use and enjoyment of its successors, assigns or other legal representatives, as fully and entirely as the same would have been held and enjoyed by Assignor if this Assignment and the sale contemplated by the Agreement had not been made, together with all income, royalties, damages or payments due or payable as of the Effective Date or thereafter, including, without limitation, all causes of action, claims, demands or other rights to or for damages (including without limitation attorneys' fees) by reason of past, present or further infringement or other unauthorized use of the Patent, with the right to sue for, and collect the same for Assignee's own use and enjoyment, and for the use and enjoyment of its successors, assigns, or other legal representatives.
