PATENT ASSIGNMENT AGREEMENT

This PATENT ASSIGNMENT AGREEMENT ("Agreement") is made and entered into as of the 25TH day of March, 2020, by and between KSB Holdings LLC, a North Carolina limited liability company ("Assignor"), and REVOLUTION Turbine Technologies LLC, a Delaware limited liability company ("Assignee").

RECITALS

WHEREAS, Assignor wishes to assign to Assignee, and Assignee wishes to acquire from Assignor, the patents and patent applications identified in Schedule A attached hereto (collectively, "the Patents"), including, but not limited to, any continuations, continuations-in-part, divisions, provisional and non-provisional applications, reexaminations, reissues, and extensions of the Patents.

AGREEMENT

NOW, THEREFORE, in consideration of the foregoing premises and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties hereto hereby agree as follows:

1. **Assignment.** Assignor hereby sells, assigns, conveys and transfers to Assignee, and Assignee hereby purchases, acquires and accepts from Assignor, all worldwide right, title and interest in, to and under all Patents, together with all continuations, continuations-in-part, divisions, provisional and non-provisional applications, reexaminations, reissues and extensions thereof, the inventions described and claimed therein, and all United States and foreign patents and filings, utility models, and design registrations that may be (or have been) filed or granted based on such inventions or improvements, and the right to claim priority based on the filing date of the applications and patents under the International Convention for the Protection of Industrial Property, the Patent Cooperation Treaty, the European Patent Convention, and all other treaties of like purposes, all rights to sue and recover damages for past, present and future infringement of the Patents, whether arising prior to or subsequent to the date hereof, the same to be held and enjoyed by Assignee, its successors and assigns from and after the date of this Agreement as fully and entirely as the same would have been held and enjoyed by Assignor had this Agreement not been made.
2. **Authorization.** Assignor hereby authorizes the Commissioner of Patents and Trademarks (and the equivalent authority in foreign patent offices) to record this Agreement and transfer the Patents and any Patent applications to Assignee as assignee of the entire right, title and interest therein or otherwise as Assignee may direct, in accordance with this instrument of assignment.
3. **Entire Agreement.** This Agreement constitutes the sole understanding of the parties with respect to the transactions provided herein and supersedes and merges herein any previous agreements and understandings, oral and written, between the parties hereto with respect to the subject matter hereof.

4. Amendments. This Agreement may not be amended or modified except by an instrument in writing signed by Assignor and Assignee.

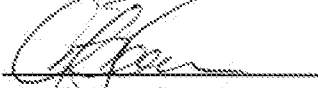

5. Further Assurances. From and after the date hereof but subject to the terms and conditions hereof, Assignor and Assignee shall do all such acts and execute all such further documents and instruments as may be reasonably required to memorialize and make effective the transactions contemplated hereby.

6. Governing Law. All matters relating to the interpretation, construction, validity and enforcement of this Agreement shall be governed by and construed in accordance with the domestic laws of the State of North Carolina without giving effect to any choice or conflict of law provision or rule (whether of the State of North Carolina or any other jurisdiction) that would cause the application of laws of any jurisdiction other than the State of North Carolina.

7. Counterparts. This Agreement may be executed in two original, facsimile or electronic counterparts, each of which will be deemed an original, both of which when taken together will constitute one and the same instrument.
