ASSIGNMENT

WHEREAS, Junjie Gu, (herein after collectively referred to as "Assignor"), having an address of (203 Annapolis Cir., Ottawa, Ontario (CA)K1V1Z1), is the sole and exclusive owner of the invention described in the following patent applications, and is the sole and exclusive owner of an intellectual property rights in and to the subject matter of the following patent and/or patent applications:

US Patent No., US 7,685,839 B2, entitled " REFRIGERATION SYSTEM", filed on Jul. 8, 2005.

WHEREAS, Anhui MetaEnergy Technologies Co. Ltd. (the "Assignee"), is a Chinese corporation having a place of business at Building 17, University of Science and Technology of China Alumni Park, Luyang District, Hefei, China, and desires to acquire the entire right, title and interest in and to said invention, said patent, said applications, any letters patent that may be granted for said invention in the United States and in any and all foreign countries, all rights associated with the invention, patent and/or patent applications and all rights to recover that may stem from the invention and patent applications in the United States and in any and all foreign countries.

NOW, THEREFORE, in consideration of the recitals, set forth above and set out in the Acquisition Agreement executed contemporaneously I herewith, and for other valuable consideration, the receipt and sufficiency of which are hereby acknowledged; Assignor hereby sells, quit claims, assigns and transfers to Assignee, the entire right, title and interest in and to said invention, said patents said applications and any and all letters patent which may be granted for said invention or result from said applications in the United States and throughout the world, and in and to any and all divisions, reissues; continuations, continuations-in-part, reexamination certificates, utility models or other applications or intellectual property rights of any type covering said invention or based upon or claiming priority to either of said applications or any related application, together with all rights of Assignor associated there with, including the right to file additional U.S. and foreign applications for said inventions directly in the name of Assignee and to claim priority rights deriving from said applications by virtue of U.S. laws, international conventions; treaty or otherwise, and to sue for and collect damages by reason of past, present or future infringement. Said invention, patents, applications, all letters patent which may be granted for said invention, and all other intellectual property rights covering said invention or based upon or claiming priority to said applications or any related applications shall be held and enjoyed by Assignee and its success or sand assigns as fully and entirely as the same would have been held and enjoyed by Assignor had this assignment, transfer and sale not been made. Assignor hereby authorizes and requests the respective national, regional and international patent offices to issue to Assignee all letters patent which may be granted for said invention or result from said applications. Assignor agrees to execute all instruments and documents required

for the making and prosecution of these and related applications for United States and foreign letters patent on said invention, for litigation regarding any related letters patent, or for the purpose of establishing or protecting title to said invention or letters patent therefor.
