ASSIGNMENT

WHEREAS, I, **John DaSilveira**, am the sole inventor of "**Staggered and Interlocking Cattle Freestall Assembly**", for which application papers were submitted on **April 24, 2020**, and assigned serial number **16/858,517**; and

NOW THEREFORE, for valuable consideration received, I hereby assign and transfer to **DaSilveira Southwest, Inc. ("DSS")**, its successors, assigns, designees and legal representatives, all rights, title and interest in and to said invention in the United States and in all other countries throughout the world; including without limitation those in and to the above-named application and any continuation, substitute or division application thereof and the patent or patents which may be issued thereon in the United States and any reissue of any such patent, and those in and to any application or patent or utility model in any and all such other countries of the world, and further including the right to file further applications in all countries throughout the world in the name of **DSS** or whomsoever that company may nominate, and to claim the priority of the above-named application or any other application permitted under the International Convention of Paris of 1883.

And I hereby authorize and request the Commissioner of Patents and Trademarks to issue any and all Letters Patent of the United States on said invention or resulting from said application and from any and all divisions, continuations, and reissues thereof, to **DSS**, its successors, assigns, designees or other legal representatives, as assignee of my entire interest, and hereby covenant that I have the full right to convey the entire interest herein assigned, and that I have not executed and will not execute any agreement in conflict herewith.

And I further hereby covenant and agree that I will, at any time, upon request, execute and deliver any and all papers that may be necessary or desirable to perfect the title of said invention and to such Letters Patent as may be granted therefore, to **DSS**, its successors, assigns, designees, or other legal representatives and that if **DSS**, its successors, assigns, designees or other legal representatives shall desire to file any divisional or continuation applications or to secure a reexamination or reissue of such Letters Patent, or to file a disclaimer relating thereto, will upon request, sign all papers, make all rightful oaths and do all lawful acts requisite for the filing of such divisional or continuation application, or such application for reissue and the procuring thereof, and for the filing of such disclaimer, without further compensation but at the expense of **DSS**, its successors, designees or other legal representatives.

And I do further covenant and agree that I will, at any time upon request, communicate to **DSS**, its successors, assigns, designees or other legal representatives, such facts relating to said invention and Letters Patent or the file history thereof as may be known to me, and testify as to the same in any interference or other litigation when requested so to do, without further compensation but at the expense of said assignee, designee, its successors, or other legal representatives.

And I hereby agree that I will upon request execute any instrument which **DSS**, or whomsoever that company may nominate, desires to carry this Assignment in effect, and perfect the title transferred hereby, or to prosecute any of the above-mentioned applications or any foreign application on this invention.
