WHEREAS, Assignor(s) identified above (hereinafter, individually and collectively the "Assignor"), has invented and created certain new, original, ornamental/industrial design(s) for an article of manufacture (the "Design"), disclosed and described in an application for a design patent in the United States ("U.S.") filed on the filing date indicated above in the United States Patent and Trademark Office ("USPTO") and identified by the title, application number, and/or attorney docket number indicated above (the "Design Application");

WHEREAS, Assignee, a corporation organized and existing under the laws of the State indicated above, and having its principal place of business at the address indicated above, desires to acquire the entire right, title, and interest of Assignor in and to the Design, the Design Application and in, to, and under any and all design patents and industrial design registrations to be obtained therefor;

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which Assignor hereby expressly acknowledges, Assignor has sold, assigned, and transferred and does hereby sell, assign, and transfer to Assignee, its successors, legal representatives, and assigns, the entire right, title, and interest in and to the Design, the Design Application, and all divisional, continuation, continuation-in-part, and continuing prosecution applications that claim priority thereto, and any reexamination and reissue applications thereof; all international, regional, and foreign applications, including registered Community Designs and unregistered Community Design Rights, that claim priority to, are counterparts of, or otherwise correspond thereto, including applications listed in Exhibit A; the design patent(s) in the United States and corresponding industrial design registrations and unregistered design rights in countries or regions foreign thereto, that may or shall issue or have issued therefrom; any extensions, substitutes, or renewals thereof; the right to claim priority to the filing date of the Design Application; any right, title, or interest in and to the Design and the Design Application under any international conventions; and any and all rights to collect damages for past, present, or future infringement of any U.S. or foreign patent or industrial design registration rights in the Design which may be, shall be, or have been granted (collectively "the Design Rights"); and

Assignor further authorizes Assignee, its successors, and assigns, or anyone they may properly designate, to apply for a design patent in the U.S. and corresponding design registrations in any and all foreign countries and regions, in its own name if desired, and otherwise take advantage of the provisions of any international conventions; and

Assignor hereby authorizes and requests transfer of the Design Application and any further applications, including applications listed in Exhibit A, which may be or shall have been filed under the Design Rights, to Assignee in accordance herewith and further authorizes and requests any official of any State whose duty consists of issuing design registrations or other evidence or forms of any industrial property protection issuing from the Design Application and all related applications, including applications listed in Exhibit A, to issue same to Assignee, its successors, and assigns in accordance herewith; and

Assignor hereby authorizes Assignee, its successors and assigns, or anyone they may properly designate, to insert in this instrument the application number and filing date of the Design Application, and to insert in Exhibit A the application number and filing date of any application that claims priority to, is a counterpart of, or otherwise corresponds to the Design Application, once known; and

Assignor, Assignor's successors, legal representatives, or administrators will at any time upon request, without further or additional consideration, but at the expense of Assignee, its successors, and assigns, execute such additional writings and do such additional acts as Assignee, its successors, and assigns, may deem necessary or desirable to perfect Assignee's enjoyment of this grant, and render all necessary assistance in making application for, obtaining, and enforcing any of the Design Rights, including giving testimony in any proceedings or transactions involving such Design Rights, including all related rights and powers arising or accrued, including the right to bring, make, oppose, defend, appeal proceedings, claims or actions and obtain relief (and to retain any damages recovered) in respect of any infringement, or any other cause of action arising from ownership, of any of these assigned Design Rights, whether occurring before, on, or after the date of this agreement; and
