PATENT ASSIGNMENT

THIS PATENT ASSIGNMENT (this "Patent Assignment") from Doppler Labs, Inc., a Delaware limited liability company ("Assignor") to Dolby Laboratories Licensing Corporation, a New York corporation ("Assignee"), is effective as of December 20, 2017.

WHEREAS, Assignor and Assignee have entered into an Asset Purchase Agreement, dated as of the date hereof (the "Asset Purchase Agreement"), pursuant to which, among other things, Assignor has agreed to assign to Assignee the Assigned Patents (as defined below).

1. Assigned Patents. The term "Assigned Patents" means the issued patents set forth on Schedule A attached hereto.

2. Assignment. For good and valuable consideration, the receipt and adequacy of which is hereby acknowledged, Assignor hereby irrevocably assigns, transfers, sells and delivers to Assignee all of Assignor's right, title and interest in and to (i) the Assigned Patents and the inventions and improvements disclosed therein; (ii) all reissues, divisionals, continuations, continuations-in-part, extensions, renewals, reexaminations and foreign counterparts thereof; (iii) all patents and applications which claim priority to or have common priority with any such patents or patent applications; and (iv) all rights corresponding to any of the foregoing throughout the world, including the right to claim priority from any of the Assigned Patents, the right to prosecute and maintain any of the Assigned Patents, and the right to sue, claim remedies and recover damages for past, present and future infringement or other violation or impairment of any of the Assigned Patents, the same to be held and enjoyed by Assignee for its own use and enjoyment, and for the use and enjoyment of its successors, assigns and other legal representatives, as fully and entirely as the same would have been held and enjoyed by Assignor, if this assignment and sale had not been made.

3. Representations and Warranties. Assignor represents and warrants that, as of the date hereof: (i) Assignor owns the Assigned Patents; (ii) Assignor has the power and authority to execute this Patent Assignment; (iii) Assignor has not entered into any agreement that conflicts with the terms of this Patent Assignment.

4. Further Assurances. Assignor agrees that Assignee shall have the right to file or record this Patent Assignment with the United States Patent and Trademark Office or other such entities throughout the world, and Assignor authorizes and requests the relevant authorities to record Assignee as the assignee and owner of the Assigned Patents. Assignor shall execute and deliver to Assignee such documents and take such actions as requested by Assignee to register, evidence or perfect Assignee's rights under this Patent Assignment. In addition, Assignor hereby irrevocably designates and appoints Assignee and its duly authorized officers and agents as its agents and attorneys in fact, to act for and on their behalf and stead to execute and file any such documents and to do all other lawfully permitted acts to register, evidence or perfect Assignee's rights under this Patent Assignment with the same legal force and effect as if executed by Assignor. This includes, but is not limited to, the power to insert on this Patent Assignment any further identification that may be necessary to comply with the rules of the United States Patent and Trademark Office, or rules of other entities throughout the world, for recordation of this document.

5. Governing Law. This Patent Assignment shall be governed by and construed in accordance with the laws of the State of Delaware, without giving effect to principles of conflicts of laws that would require the application of the laws of any other jurisdiction. Any action or proceeding arising out of this Patent Assignment shall be brought and maintained exclusively in the courts of the State of California located in the City of San Francisco or in the United States District Court for the Northern District of California. The parties irrevocably submit to the jurisdiction of the courts of the State of California located in the City of San Francisco and the United States District Court for the Northern District of California and appellate courts from any thereof for the purpose of any action or proceeding based hereon or arising out of this Patent Assignment and irrevocably agrees to be bound by any judgment rendered thereby in connection with such action or proceedings.
