ASSIGNMENT

This Assignment is from Ronald Evans and Annette Atkins, both c/o the Salk Institute for Biological Studies, (“Inventor(s)” to the **HOWARD HUGHES MEDICAL INSTITUTE** (Assignor), a Delaware corporation, having a place of business at 4000 Jones Bridge Road, Chevy Chase, MD 20815-6789.

Recitals

WHEREAS, Inventor(s) are employee(s) of the Institute and, as a condition of their employment, have signed the Agreement appended to the Institute’s Statement of Policy on Intellectual property (the “Intellectual Property Agreement”);

WHEREAS, pursuant to the Intellectual Property Agreement, Inventor(s) have agreed (a) to assign to the Institute all rights they may acquire in any invention, discovery, improvement, or other intellectual property, whether or not patentable or copyrightable, developed directly or indirectly as a result of a program of research financed by Institute funds or by funds under the control of the Institute (each a “Subject Property”) and (b) to execute any agreements that may be desired by the Institute in connection with such assignment;

WHEREAS, Inventor(s) have, alone or with others, invented “COMPOSITIONS AND METHODS FOR ORGANOID GENERATION AND DISEASE MODELING,” as set forth in:

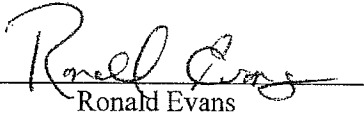

International Application No.: PCT/US2017/034278, filed May 24, 2017 and U.S. Provisional Patent Application No. 62/341,461, filed May 25, 2016; respectively, (collectively referred to as the “Invention”) and the Invention is a Subject Property;

WHEREAS, Inventor(s) seek to make a formal assignment of their interest in the invention to the Institute, and the Institute desires the execution of a formal assignment of all of Inventors' right, title and interest in the Invention.

NOW THEREFORE, in consideration of the promises contained in the acts performed and to be performed pursuant to the Intellectual Property Agreement and of other good and valuable consideration, the receipt of which is hereby acknowledged by Inventors, Inventors agree as follows:

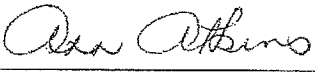

1. Assignment. Inventor(s) hereby assign to the Institute their entire right, title and interest in the Invention; any United States patent applications and all corresponding foreign patent applications which are directed to the Invention any and all patents issued therefrom; all United States or foreign division and continuation applications based on any of the foregoing applications, and any and all patents issued therefrom; and reissues or extensions of any such patents; and all claims which are directed to the Invention and which may be contained in continuation-in-part applications or in patents which issue therefrom.
2. Cooperation. Inventor(s) agree to execute upon request such further assignments, documents, and other instruments as may be necessary or desirable to assign Inventors' entire right, title and interest in the Invention to the Institute and to assist the Institute (or others at the direction of the Institute) in applying for, obtaining, and enforcing patents, copyrights, or other rights in the United States and in any foreign country with respect to the invention.
3. Parties. The terms and provisions of this Assignment shall inure to the benefit of the Institute and its successors and assigns and shall be binding on the Inventors and their heirs, personal representatives and assigns.

4. Warranty. Inventor(s) warrant and represent that they have not entered into any assignment, contract, or understanding in conflict herewith, and that there is no other person or entity whose consent is required in order for the inventors to make the assignment contained herein.
