Assignment of Rights – Patent Application

For valuable consideration, the receipt of which is acknowledged, **Paul Lapstun** ("Assignor") assigns to **Vergent Research Pty Ltd** ("Assignee") 100% of his or her right, title, and interest in and to the patent application entitled "**Multi-View Scanning Aerial Imaging**" described in U.S. Patent Application Number **17/085,929** filed on **October 30, 2020** ("Patent Application"), and any inventions and improvements disclosed in the Patent Application (as well as such rights in any divisions, continuations in whole or part, or substitute applications), for the entire term of any patent (and any reissues or extensions) that may be granted from the Patent Application, and for the entire terms of any and all foreign patents that may issue from foreign applications (as well as any divisions, continuations in whole or part, or substitute applications) filed claiming the benefit of the Patent Application.

Assignor authorizes the United States Patent and Trademark Office to issue any patents resulting from the Patent Application to Assignee according to the percentage interest indicated in this assignment. The right, title, and interest is to be held and enjoyed by Assignee and Assignee's successors and assigns as fully and exclusively as it would have been held and enjoyed by Assignor had this assignment not been made. Assignor further agrees to: (a) cooperate with Assignee in the prosecution of the Patent Application and any foreign counterparts; (b) execute, verify, acknowledge, and deliver all such further papers, including patent applications and instruments of transfer; and (c) perform such other acts as Assignee lawfully may request to obtain a patent from the Patent Application, or maintain any patent resulting from the Patent Application, in any and all countries.

Date: **October 30, 2020**
