INTELLECTUAL PROPERTY ASSIGNMENT AGREEMENT

This Intellectual Property Assignment Agreement (this "Assignment Agreement") is duly made, executed and delivered as of October 30, 2020, by and between Versare Solutions, LLC, a Delaware limited liability company ("Assignee"), and Everblock Systems, LLC, a New York limited liability company ("Assignor"). Capitalized terms used but not defined herein shall have the meanings ascribed to such terms in the Asset Purchase Agreement, dated as of the date hereof (as amended or otherwise modified from time to time, the "Purchase Agreement"), by and among Assignor, Assignee, Versare Holdings, LLC, a Delaware limited liability company and the Equityholders named therein.

RECITALS:

A. Pursuant to, and subject to the terms and conditions of, the Purchase Agreement, Assignor desires to sell, convey, transfer, deliver and assign to Assignee the Proprietary Rights owned by, licensed to or used or held for use by Assignor and all goodwill associated therewith, including the Proprietary Rights listed on Exhibit A hereto.

B. Pursuant to the Purchase Agreement, the execution and delivery of this Assignment Agreement is a condition precedent to the closing of the transactions contemplated by the Purchase Agreement.

C. Assignor is willing to assign all rights it may have in and to the Seller Proprietary Rights on the terms and subject to the conditions set forth in this Assignment Agreement.

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, Assignor and Assignee agree as follows:

1. Assignment. Effective as of the date hereof, Assignor hereby irrevocably sells, transfers, assigns, and conveys to Assignee, its successors and assigns, in perpetuity, and Assignee hereby accepts, all of Assignor's worldwide right, title and interest in and to the Seller Proprietary Rights, including the Proprietary Rights identified in Exhibit A, all provisionals, continuations, divisionals, continuations-in-part, reexaminations, reissues, renewals and extensions, and all common law rights in, and all goodwill and moral rights associated with, any of the foregoing (collectively, the "Assigned IP"), together with all of Assignor's right to file patent, trademark and copyright applications in the United States and throughout the world for the Seller Proprietary Rights in the name of the Assignee, its successors and assigns; and all claims, demands, income, damages, royalties, payments, accounts and accounts receivable now or hereafter due and/or payable, and rights to causes of action and remedies, related to any of the Seller Proprietary Rights, including without limitation all proceeds to infringement suits, the right to sue, prosecute and collect damages for past, present and future infringement, misappropriation or other violation of rights related to the Seller Proprietary Rights, and all rights corresponding thereto throughout the world for the Seller Proprietary Rights assigned herein.

2. Further Assurances. Assignor shall provide Assignee, its successors and assigns with all such assistance as they may reasonably request to consummate the transactions hereby, above, including, without limitation, upon request by Assignee to execute any further assignments or other documents or instruments necessary or desirable to confirm, record or otherwise carry out the purposes or intent of this Assignment Agreement. Without limiting the foregoing, Assignor will do all things necessary, proper or advisable to reasonably assist Assignee in transferring all domain names that are Seller Proprietary Rights, including as applicable, placing each of the domain names in "unlocked" status and provide to Assignee the Internet domain name registrars' transfer authorization codes for each of the domain names and any other information required to effectuate the transfer of Assignor's right, title and interest in the

domain names to Assignee. Assignor acknowledges and agrees that Assignee or any of its Affiliates may record and perfect this Assignment or such documentation in any jurisdiction throughout the world, at the sole cost of Assignee, and Assignor shall reasonably cooperate therewith. Assignor shall not assert any right, title or interest in or to any of the Assigned IP and shall not use any of the Assigned IP except as otherwise expressly authorized by Assignee in writing.

3. Terms of the Purchase Agreement. The terms of the Purchase Agreement, including, but not limited to, the representations, warranties, covenants, agreements and indemnities relating to the Assigned IP are incorporated herein by this reference. The parties hereto acknowledge and agree that the representations, warranties, covenants, agreements and indemnities contained in the Purchase Agreement shall not be superseded hereby but shall remain in full force and effect to the full extent provided therein. In the event of any conflict or inconsistency between the terms of the Purchase Agreement and the terms hereof, the terms of the Purchase Agreement shall govern.

4. Controlling Law And Jurisdiction. This Assignment Agreement is governed by and will be construed in accordance with the laws of Delaware, applicable therein without giving effect to any choice of law or conflict of law provision or rule (whether Delaware or any other jurisdictions) that would cause the application of the laws of any jurisdiction other than Delaware.

5. Entire Agreement; Amendment. This Assignment Agreement, together with Exhibit A attached hereto, the Purchase Agreement and the other agreements contemplated thereby, constitute the entire agreement between the parties with respect to the subject matter hereof, and supersede any and all other understandings and agreements, either oral or written, between the parties hereto with respect to such subject matter. This Agreement may not be altered, amended or modified, except by written instrument signed by the parties hereto.

6. Non-Waiver of Rights. The failure of a party hereto to enforce any of the provisions of this Assignment Agreement or any rights with respect thereto shall in no way be considered to be a waiver of such provisions or rights or in any way affect the validity of this Assignment Agreement. In order to be enforceable, a waiver must be in writing and signed by the party against whom the waiver is to be enforced. The failure of any party to exercise any of said provisions or rights shall not preclude or prejudice such party from later enforcing or exercising the same or any other provisions or rights that it may have under this Assignment Agreement.

7. Headings. The headings and captions used in this Assignment Agreement are intended and shall for all purposes be deemed to be for convenience only and shall have no force or effect whatsoever in the interpretation of this Assignment Agreement.

8. Counterparts. This Assignment Agreement may be executed in multiple counterparts (including facsimile or other electronically transmitted counterparts), each of which will be deemed an original, but all of which together shall constitute one agreement.

9. Invalid Provisions. If any term, provision, covenant or condition of this Assignment Agreement is held by a court of competent jurisdiction to be invalid, void or unenforceable, the parties desire the remainder of the provisions to remain in full force and effect and not to be affected, impaired or invalidated.
