("the Assignor(s)")

and:

Anteris Technologies Corporation
860 Blue Gentian Road, Suite 340
Eagan MN 55121
United States of America

("the Assignee(s)")

WHEREAS:-

The Assignors have invented a new and useful invention as described in PCT Patent Application entitled **REPLACEMENT HEART VALVE ASSEMBLY WITH A VALVE LOADED DISTALLY FROM A STENT** (the "Invention"), the application being identifiable by PCT Application No. PCT/US2019/033167, filed with the World Intellectual Property Office on May 20, 2019 (the "Application").

The Assignors agreed to assign to the Assignee(s) all right, title and interest in the invention(s) and in any and all applications filed thereon, throughout the world. The Assignors have further agreed to assign any copyright, design right, know how, or other intellectual properties associated with the Invention(s) to the Assignee(s).

The Assignee was formerly known as Admedus Corporation and changed its name with an effective date of May 22, 2020.

NOW THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Assignors each, individually and separately, hereby transfer to Assignee, its successors and assigns, any and all of his or her entire right, title, and interest in and to, including the right to sue for and collect damages for past, present, and future infringement of, (1) the Invention throughout the world, (2) the above-identified Application and all corresponding domestic and foreign applications including any provisional, non-provisional, divisional, continuation, continuation-in-part, reissue application, or any other application based on the invention, (3) all Letters Patent or similar legal protection issuing thereon, (4) all trade secrets and know-how pertaining to the invention, and (5) all rights and benefits under any applicable treaty or convention; and we each authorize the Commissioner of Patents and Trademarks of the United States or foreign equivalent therefor to issue the Letters Patent or similar legal protection to the Assignee.

The Assignors each, individually and separately, authorize the Assignee, its successors and assigns or anyone it may properly designate, to apply for Letters Patent or similar legal protection for the Invention, in its own name if desired, in any jurisdiction and to make a claim of priority to any applications as entitled under U.S. law or applicable international conventions, treaties, or otherwise.

The Assignors each, individually and separately, represent to the Assignee, its successors and assigns, that the Assignors each, individually and separately, have not and shall not execute any writing or do any act whatsoever conflicting with this Assignment. The Assignors each, individually and separately, our executors or administrators, will at any time upon request, without additional consideration, but at the expense of the Assignee, its successors and assigns, execute such additional writings and do such additional acts as the Assignee, its successors and assigns, may deem desirable to perfect its enjoyment of this grant, and render all assistance in making application for and obtaining, maintaining, and enforcing the Letters Patent or similar legal protection on the Invention in any and all countries.

The Assignors each, individually and separately, represent and warrant that the Assignors each, individually and separately, have full power to enter into and perform this assignment, and that the Assignors each, individually and separately, have not granted any other person or entity any interest in the Invention and/or the Application. This Assignment shall be governed by the laws of the state of Minnesota.
