DECLARATION (37 C.F.R. 1.63) FOR UTILITY PATENT APPLICATION USING AN APPLICATION DATA SHEET (37 C.F.R. 1.76) AND ASSIGNMENT

As below named inventors, we hereby declare that:

This Declaration and Assignment is directed to the attached United States Patent Application entitled "**Safety Device.**"

The above-identified application was made or authorized to be made by us.

We believe that we are the original joint inventors of a claimed invention in the above-identified patent application.

We have reviewed and understand the contents of the above-identified patent application, including the claims.

We are aware of the duty to disclose to the United States Patent and Trademark Office all information known to us to be material to patentability as defined in 37 CFR Section 1.56.

Whereas, the undersigned inventors have made certain inventions, improvements, and discoveries (herein referred to as the "Invention") disclosed in the above-identified patent application and further identified by the Docket Number provided above in the header of this document;

Whereas, **SCHROTH SAFETY PRODUCTS LLC.**, a limited liability corporation of DELAWARE, registered as a foreign limited liability company in FLORIDA, having a place of business at **1371 SW 8th St., Unit #3, Pompano Beach, FL 33069 USA** (herein referred to as "**ASSIGNEE**"), desires to acquire, and each undersigned inventor desires to grant to **ASSIGNEE**, the entire worldwide right, title, and interest in and to the Invention and in and to any and all patent applications and patents directed thereto;

Now, therefore, for good and valuable consideration, the receipt and sufficiency thereof being hereby acknowledged, each undersigned inventor ("**ASSIGNOR**") hereby sells or has sold, assigns or has assigned, and otherwise transfers or has transferred to **ASSIGNEE**, its successors, legal representatives, and assigns, the entire worldwide right, title, and interest in and to the Invention, the above-identified United States patent application, and any and all other patent applications and patents for the Invention which may be applied for or granted therefor in the United States and in all foreign countries and jurisdictions, including all divisions, continuations, continuations-in-part, reissues, reexaminations, renewals, extensions, counterparts, substitutes, and extensions thereof, and all rights of priority resulting from the filing of such applications and granting of such patents.

In addition, each undersigned inventor hereby authorizes and requests the Director of the United States Patent and Trademark Office to issue any United States Patent, and foreign patent authorities to issue any foreign patent, granted for the Invention, to **ASSIGNEE**, its successors, legal representatives, and assigns, the entire worldwide right, title, and interest in and to the same to be held and enjoyed by the **ASSIGNEE**, its successors, legal representatives, and assigns to the full end of the terms for which any and all such patents may be granted, as fully and entirely as would have been held and enjoyed by the undersigned had this Assignment not been made; and each undersigned inventor agrees to execute any and all documents and instruments and perform all lawful acts reasonably related to recording this Assignment or perfecting title to the Invention and all related patents and applications, in the **ASSIGNEE**, its successors, legal representatives, and assigns, whenever requested by **ASSIGNEE**, its successors, legal representatives, or assigns.

Each undersigned inventor acknowledges his prior and ongoing obligations to sell, assign, and transfer the rights under this Assignment to **ASSIGNEE** and is unaware of any reason why they may not have the full and unencumbered right to sell, assign, and transfer the rights hereby sold, assigned, and transferred, and has not executed, and will not execute, any document or instrument in conflict herewith. Each undersigned inventor also hereby grants **ASSIGNEE**, its successors, legal representatives, and assigns, the right to insert in this Assignment any further identification (including, but not limited to, patent Application Number) which may be necessary or desirable for recordation of this Assignment. This Assignment is governed by the substantive laws of the State of FLORIDA, and any disputes will be resolved in a FLORIDA state court or federal court sited in FLORIDA.
