## ASSIGNMENT AGREEMENT

I, Jason A. Sullivan ("Sullivan"), have invented certain inventions, wherein preferred embodiments of said inventions are disclosed in the United States patent applications listed herein as Exhibit A (hereinafter called the "Inventions".) I have granted licenses or other rights to some or all of the Inventions to ISYS Technologies, Inc. ("ISYS") (collectively, Sullivan and ISYS are referred to as the "Assignors").

ATD Ventures LLC, a Utah limited liability company (the "Assignee") having a principal place of business at 595 South Riverwoods Pkwy, Suite 400, Logan, UT 84321 has acquired all of the rights of Computive Corporation, KAM Systems, LLC, KAM Investments, LLC and MI, LLC under that certain Judgment issued by the Third Judicial District Court of Salt Lake County on August 13, 2013 against Sullivan, ISYS, and Coded Instruction Security Corporation ("Judgment").

Pursuant to the order of the Judgment, Assignors hereby irrevocably and unconditionally assign to Assignee all right title and interest in the Inventions, all General Intangibles, United States patents and patent applications, all related licenses and royalties and all proceeds from the Patent Rights (as defined in the Judgment), including but not limited to the following:

The entire rights, titles, and interests, and all accrued rights, in said Inventions; in the above-identified United States patent applications and patents listed in Exhibit A, and in all patent applications and patents claiming priority from or to any of the foregoing, including provisionals, non-provisionals, divisionals, continuations and continuations-in-part of said applications, and all reissues, reexaminations and extensions of Letters Patent and Patents granted thereon; in all corresponding applications filed in countries foreign to the United States; and in all patents issuing thereon in the United States and foreign countries.

The right to file foreign patent applications on said Inventions, including any improvements, related new matter, and applications based thereon, growing out of or relating to the Inventions, in its own name, wherever such right may be legally exercised, including the right to claim the benefits of the International Convention for such applications.

The right to sue, counterclaim, and recover for past, present and future infringement of the rights assigned or to be assigned under this Assignment.

Assignors hereby authorize and request the United States Commissioner for Patents, and such Patent Office officials in foreign countries as are duly authorized by their laws to issue patents, to record and issue a notice of recordation of this Assignment, and to issue all patents on said Inventions to Assignee as the owner of the entire interest, for the sole use and benefit of the said Assignee, its successors, assigns, heirs and legal representatives. For the avoidance of doubt, Assignors expressly agree that this assignment and agreement may be disclosed by Assignee in its sole discretion.

Assignors hereby agree, without further consideration and without expense to me, to render all reasonable assistance requested by Assignee to secure, protect and enforce Assignee's rights in the Inventions, and to further the prosecution of any patent applications with respect to such Inventions, including, but not limited to, the execution, filing, or delivery of any assignment, application, oath, affidavit, declaration, power of attorney, petition or other instrument reasonably requested by Assignee.

In the event Assignee is unable, after reasonable effort, to secure any of Assignors' signatures on any document or instrument reasonably required to be signed by any of the Assignors relating to the Inventions or relating to the patent applications with respect to such Inventions, whether because of availability or physical or mental incapacity or for any other reason whatsoever, each Assignor hereby designates and appoints Assignee and its duly authorized officers and agents as their agent and attorney-in-fact to act for and on their behalf and stead to execute, file, or deliver any such documents or instruments and do all other lawfully permitted acts to protect and enforce Assignee's rights in the Inventions and to further the prosecution, issuance and enforcement of any patents relating to such Inventions, with the same legal force and effect as if executed, filed, or delivered by the Assignors. This assignment and agreement shall be binding upon Assignors' successors, assigns, heirs and legal representatives.
