ASSIGNMENT OF INVENTION AND PATENT APPLICATION

Docket 102.007US1,

U.S. Utility Patent Application Serial No. 14/594,980

FUSION PROTEINS CONTAINING INSULIN-LIKE GROWTH FACTOR-1 AND EPIDERMAL GROWTH FACTOR AND VARIANTS THEREOF AND USES THEREOF

Inventor: Hugh McTavish

Filing date: January 12, 2015

I, Hugh McTavish, hereafter referred to as Assignor, have invented certain new and useful improvements, for which the above-referenced International Patent Application has been filed; and

IGF Oncology, LLC, hereinafter referred to as assignee, whose mailing address is 7460 Pinehurst Road, Pine Springs, MN 55115, desires to acquire all rights in and to the Patent Application and the patent (and any divisions, continuations, continuations-in-part, reissues, extensions, foreign patent applications, and foreign patents) that may be granted.

Therefore, in consideration of the sum of one dollar and other good and valuable consideration, the receipt of which is acknowledged, I the Assignor assign to the Assignee, its successors and assigns, all right, title, and interest in the invention and Patent Application (as well as such rights divisions, continuations, or substitute applications) and in any and all Letters Patent and reissues and extensions thereof, of the United States of America and all countries foreign thereto (including the right to apply for Letters Patent in foreign countries in its own name and to claim any priority rights for such foreign applications to which such applications are entitled under international conventions, treaties, or otherwise) which have been or may be granted on any of the foregoing to be held and enjoyed as fully and exclusively as they would have been by me had this assignment not been made.

The Assignor authorizes the United States Patent and Trademark Office and foreign patent offices to issue any Patents resulting from the Patent Application to the Assignee. The right, title, and interest is to be held and enjoyed by the Assignee and the Assignee's successors and assigns as fully and exclusively as it would have been held and enjoyed by the Assignor had this assignment not been made.

I, the Assignor, do further agree for myself and for my heirs, executors and administrators, to: (a) cooperate with the Assignee in the prosecution of the Application and foreign counterparts; (b) execute, verify, acknowledge, and deliver all such further papers, including patent applications and instruments of transfer; and (c) perform such other acts as the Assignee lawfully may request to obtain or maintain the patent for the invention in any and all countries.
