## ASSIGNMENT OF INVENTION AND PATENT RIGHTS

---

WHEREAS, Martin Zebhauser, an individual and citizen of Germany residing at Lepperding 28, 83410 Laufen, Germany; Paul Schroeder, an individual and citizen of the Germany residing at Schiffmeistergasse 20, 83410 Laufen, Germany; Markus Henning, an individual and citizen of Germany residing at Zum Bahnhof 11, 99310 Arnstadt, Germany and Stefan Loeffelholz, an individual and citizen of Germany residing at Lindenstr. 16, 64653 Lorsch, Germany (the foregoing hereinafter collectively referred to as "Assignors", each of them individually an "Assignor"), are each named as a joint inventor in, and are the only inventors named in, International Patent Application No. PCT/EP2019/063099 entitled "SECURING SYSTEM FOR PLUG CONNECTORS" which was filed on May 21, 2019 and designated the United States and at least one country in addition to the United States (the "International Application");

WHEREAS, Rosenberger Hochfrequenztechnik GmbH & Co. KG, a German limited liability company and limited partnership having a principal place of business at Hauptstrasse 1, Fridolfing, Germany 83413 (hereinafter "Assignee"), owns and is named as the sole Applicant in the International Application, and

WHEREAS, each of the Assignors have assigned and/or are presently under an existing legal obligation to assign to Assignee, its successors and assigns, all worldwide right title and interest in, to and under the International Application and any and all existing and/or future filed U.S. patent applications claiming any right of domestic or foreign priority to the International Application ("U.S. Patent Application(s)"), and any and all inventions disclosed and/or claimed in the International Application and/or in any of the U.S. Patent Application(s) (the "Inventions"); said U.S. Patent Application(s) including without limitation any and all existing and/or future filed U.S. National Phase Entries under 35 U.S.C. §371 of the International Application.

NOW, THEREFORE, in consideration of the sum of ten Euros (€10.00) and other good and valuable consideration, the receipt, sufficiency and reasonably equivalent value of which is hereby

acknowledged, each Assignor, on behalf of himself individually, and his respective heirs, executors, legal representatives and assigns, covenants to, and does hereby, irrevocably, unconditionally and forever sell, assign, transfer and convey to Assignee, its successors and assigns, free and clear of any and all claims, liens, judgments, mortgages, security interests and/or encumbrances, the entire worldwide right, title and interest which said Assignor own, hold, or may ever come to own or hold, in, to and/or under: (i) the Inventions, and (ii) the International Application, and (iii) the U.S. Patent Application(s), including without limitation, any and all existing and/or future filed U.S. national phase entries under 35 U.S.C. § 371 of the International Application, and (iv) any and all U.S. patents which may issue at any time directly or indirectly from any and all existing and/or future filed U.S. national phase entries under 35 U.S.C. § 371 of the International Application and/or from any other U.S. Patent Application(s), for the entire of the term of each respective one of said U.S. patents, and (v) any and all existing and/or future reissues, re-examinations and extensions of any and all of said U.S. patents referred to in sub-clause iv above, for the entire of the term of each respective one of said reissues, re-examinations and extensions, and (vi) any and all patent applications filed at any time which claim, or are amended to claim, any right of priority to any of the U.S. Patent Application(s) and/or claim any right of priority through any of the U.S. Patent Application(s), including without limitation any and all divisionals, continuations and/or continuations-in-part of any of the U.S. Patent Application(s), and (vii) any and all U.S. patents which issue at any time directly or indirectly from any patent application referred to in sub-clause vi above, for the entire of the term of each respective one of said patents, and (viii) any and all existing and/or future reissues, re-examinations and extensions of any and all of said patents referred to in sub-clause vii above, each for its respective entire term, and (ix) any and all improvements of the Inventions and all existing and/or future patent rights relating to such improvements, including without limitation the sole and exclusive right to prepare, file and prosecute patent applications directed to such improvements anywhere in the world and to have patents issue thereon in the name of Assignee, its successors and assigns, and to have and retain sole and exclusive ownership of all patents on such improvements, each for its respective entire term, and (x) any and all foreign, regional and/or international counterparts and/or legal equivalents of any and all U.S. Patent

Application(s) which have been filed and/or may be filed at any future time and which claim any right of priority to any of the U.S. Patent Application(s) and/or claim any right of priority through any of the U.S. Patent Application(s), and (xi) all patents, utility models and/or other forms of protection which issue at any time directly or indirectly from any of the foreign, regional and/or international counterparts and/or legal equivalents referred to in sub-clause x above, for the entire of the term of each respective one of said patents, utility models and/or other forms of protection, and (xii) all rights resulting directly or indirectly from the filing of the International Application and/or the U.S. Patent Application(s), including without limitation, all rights of domestic priority, foreign priority and/or international priority, and any and all other rights arising under, or pursuant to, U.S. law, foreign law, the Paris Convention for the Protection of Industrial Property, the International Patent Cooperative Union, the European Patent Convention, the Common Market Convention, the Patent Cooperation Treaty and/or any and all other applicable conventions, unions and/or treaties, for each member, signatory, country and/or other adherent to such said convention, union and/or treaty, and (xiii) any and all past, present and/or future claims for damages, increased damages, reasonable royalties under 35 United States Code §154(d), costs, reasonable attorney's fees, and/or other remedies for any and all infringements and/or past infringements of any of the U.S. patents and/or other patents, reissues, re-examinations, extensions, counterparts, utility models and/or other forms of protection referred to anywhere above in this instrument, together with and including without limitation with the right to sue for, recover, collect and retain all of same for the sole and exclusive use, benefit and enjoyment of Assignee, its successors and assigns without notifying, or accounting to, any of the Assignors and/or any of their respective heirs, executors, legal representatives and/or assigns;

all of the foregoing to be owned, held and enjoyed by Assignee, its successors and assigns, for its and their own sole and exclusive use and enjoyment, to the ends of the respective terms of all U.S. patents, patents, reissues, re-examinations, extensions, counterparts, utility models and/or other forms of protection sold, assigned, transferred and/or conveyed pursuant to this instrument, as fully and entirely as the same would have been owned, held and enjoyed by each respective Assignor and his respective heirs, executors,

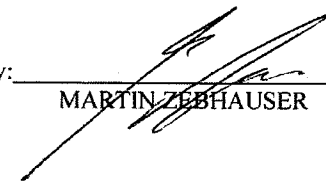

legal representatives and assigns if the sale, assignment, transfer and conveyance effected by this instrument had not been made.

Each Assignor unconditionally represents and warrants to Assignee, its successors and assigns, that: he has read and understands this instrument prior to signing it; that he has not made, entered into, or promised to make or enter into, any wills, bequests, codicils, promises, understandings, agreements, sales, assignments, transfers, conveyances, mortgages and/or security interests which are inconsistent with this instrument, and shall not do so at any time; and that he has all necessary legal rights, legal capacity and authority necessary to execute this instrument and to make the sale, assignment, transfer and conveyance effected by this instrument. All representations and warranties made in this instrument shall forever survive execution and delivery of this instrument.

Without limiting any other provision of this instrument, each Assignor hereby authorizes and requests the United States Patent & Trademark Office, and all counterpart offices in countries throughout the world, to recognize Assignee as the sole owner of, and sole applicant for, the U.S. Patent Application(s) and the Priority Application and to issue in the name of Assignee, as the assignee and owner all worldwide right, title, and interest in, to and under the same, all U.S. patents and all other patents which may issue at any time directly or indirectly from the U.S. Patent Application(s) and/or the Priority Application.

This instrument may be executed in one or more counterparts, each of which shall be deemed an original of this instrument for all purposes. Each Assignor may execute, but need not necessarily, execute one and the same counterpart as any one or more of the other Assignors. This instrument and the sale, assignment, transfer and conveyance effected hereunder by each Assignor who executes at least one counterpart of this instrument shall be valid and effective with respect to said Assignor and shall be enforceable against said Assignor irrespective of whether or not any one or more of the other Assignors does not sign at least one counterpart of this instrument.
