ASSIGNMENT

We, Troy Aaron Harvey, of Brighton, Utah, a citizen of The United States, and Jeremy Fillingim, of Salt Lake City, Utah, a citizen of The United States, have invented a certain invention entitled <u>DIGITAL LABELING CONTROL SYSTEM TERMINALS THAT ENABLE GUIDED WIRING</u> for which U.S. Utility Patent Application No. <u>17/135591</u> was filed on <u>29 December, 2020</u>.

In consideration of valuable consideration, we the undersigned, have sold, assigned, and transferred and do sell, assign, and transfer to PassiveLogic, Inc., a corporation of Delaware having a place of business at 6405 S. 3000 E., Suite 300, Salt Lake City, UT 84121, and successors and assigns, the full and exclusive right, title, and interest in the invention, patent application and patent rights throughout the United States of America, it territories and dependencies, and all other countries. This includes an assignment of all Letters Patent that may be granted for corresponding patent applications in the United States of America and all countries throughout the world, and any divisional, renewal, continuation in whole or in part, substitution, conversion, reissue, prolongation or extension thereof; and the right to claim priority from the patent application as provided by United States law, the Patent Cooperation Treaty, the European Patent Convention, and the Paris Convention.

We authorize and request the issuance of said Letters Patent to PassiveLogic, Inc., as assignee of the entire right, title, and interest, to be held as fully and entirely as the same would have been held by us, had this assignment not been made.

We warrant that there are no outstanding assignments, grants, liens, encumbrances, or agreements either written, oral, or implied that will impair diminish, limit, or abridge the interest herein conveyed at the time of the execution of the present assignment.

We also agree upon reasonable request to communicate to PassiveLogic, Inc., its representatives, assigns or agents, any facts known to us respecting the invention, and to testify in any legal proceeding, sign all lawful papers, execute all divisional, continuing and reissue applications, make all rightful oaths, provide all requested documents, and do everything reasonably possible to aid PassiveLogic, Inc. and its assigns to attain and enforce proper patent protection for the invention in the United States or any foreign country. These provisions are binding upon our heirs, legal representatives, administrators, and assigns.
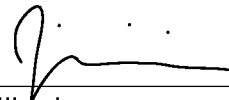

We have authorized PassiveLogic, Inc. to file and prosecute this utility patent application, as well as any corresponding patent applications, including such applications under the Patent Cooperation Treaty and/or the European Patent Convention, that claim priority from the patent application. PassiveLogic, Inc. has the right to select attorneys or agents of its choice to prosecute at its discretion these applications on its behalf.

We grant PassiveLogic, Inc. the power to insert on this Assignment any further information that may be necessary or desirable in order to comply with all applicable legal requirements, including the rules of the United States Patent and Trademark Office, for submitting and recording this document.
