PATENT ASSIGNMENT AGREEMENT

This Patent Assignment Agreement (this "Agreement") is entered into on November 22, 2013 (the "Effective Date") by QUALCOMM Incorporated ("QUALCOMM"), a Delaware corporation located at 5775 Morehouse Drive, San Diego, CA 92121, and Omnitracs, Inc. ("Omnitracs"), a Delaware corporation located at 5775 Morehouse Drive, San Diego, CA 92121. QUALCOMM and Omnitracs are referred to herein individually as a "Party" and collectively as the "Parties".

RECITALS

QUALCOMM and Omnitracs desire to set forth in this Agreement the terms and conditions regarding the assignment to Omnitracs of those issued patents and patent applications expressly identified in Exhibit A attached hereto (collectively, the "Transferred Patents").

NOW, THEREFORE, in consideration of the mutual promises set forth in this Agreement, the Parties agree as follows:

AGREEMENT

ARTICLE 1 ASSIGNMENT OF TRANSFERRED PATENTS

QUALCOMM hereby transfers and assigns to Omnitracs all of QUALCOMM's ownership right, title, and interest in and to the Transferred Patents. The foregoing transfer and assignment to Omnitracs includes, without limitation, all rights of enforcement, all claims for damages and all remedies arising out of, relating to or resulting from any such Transferred Patents or any infringements thereof, whether accrued prior to the Effective Date or hereafter, including but not limited to the right to sue for, seek, collect, recover and retain damages and any other relief arising out of or resulting from any past, present or future infringement of any such Transferred Patents, subject to the terms and encumbrances set forth in Article 2.

ARTICLE 2 NO EFFECT ON PREVIOUSLY-GRANTED RIGHTS

Omnitracs acknowledges and agrees to the following:

- (a) The transfer and assignment of the Transferred Patents in accordance with ARTICLE 1 (ASSIGNMENT OF TRANSFERRED PATENTS) does not affect (and nothing in this Agreement is intended to affect) any license rights, covenants (including without limitation covenants not to assert or covenants to exhaust remedies), or other immunities from litigation under, in, or with respect to the Transferred Patents that are or were granted, assumed or otherwise entered into prior to the sale and assignment of the Transferred Patents hereunder (collectively, the "Prior Licenses"), and the Transferred Patents shall remain subject to and encumbered by all such Prior Licenses after such sale and assignment as if Omnitracs had granted such Prior Licenses.

Without limiting the generality of the foregoing, Omnitrac agrees and acknowledges that the Prior Licenses include without limitation those patent license agreements that have been granted to third parties (each, a "Third-Party Licensee") by QUALCOMM as part of QUALCOMM's general patent licensing program, and that after the transfer and assignment of the Transferred Patents, each such Third-Party Licensee shall continue to have the licenses granted under the applicable patent license and each such Third-Party Licensee is a third party beneficiary of this Article.

- (b) QUALCOMM and each of its Affiliates reserves and retains all rights to past, present, and future royalties and other consideration given or to be given in exchange for any license, sublicense, covenant, immunity from litigation, or other rights granted with respect to any Transferred Patent arising or accruing at any time under any agreements executed by QUALCOMM or its Affiliates prior to the Effective Date. QUALCOMM and each of its Affiliates further reserves and retains the right to obtain and receive all such royalties and other consideration arising out of or accruing under any license, sublicense, covenant, immunity from litigation, or other right granted by QUALCOMM or any of its Affiliates.
- (c) QUALCOMM or any of its Affiliates may have made or offered to make one or more of the Transferred Patents subject to express or implied licensing obligations of one or more standards bodies. Accordingly, Omnitrac acknowledges and agrees that the transfer and assignment of the Transferred Patents will be subject to, and Omnitrac will abide by, all such obligations.
- (d) QUALCOMM or any of its Affiliates may have contributed computer code to an open source project or otherwise made computer code subject to the obligations of an Open Source License (collectively, the "Computer Code"). To the extent that one or more claims of the Transferred Patents read on Computer Code, Omnitrac acknowledges and agrees that the Transferred Patents may be subject to the express or implied licensing obligations of an Open Source License. Accordingly, Omnitrac acknowledges and agrees that the transfer and assignment of the Transferred Patents will be subject to, and Omnitrac will abide by, all obligations of any Open Source License governing such Computer Code.

ARTICLE 3 NO IMPLIED RIGHTS

Except for the transfer and assignment of Transferred Patents to Omnitrac under ARTICLE 1 (ASSIGNMENT OF TRANSFERRED PATENTS), this Agreement does not transfer, assign, grant or convey to any Party any rights or licenses, whether express, implied, by way of estoppel or otherwise, under any patents or other intellectual property rights.

**ARTICLE 4
FURTHER ASSURANCES**

With respect to each Transferred Patent transferred and assigned to Omnitrac under this Agreement, at Omnitrac's request, QUALCOMM will provide reasonable cooperation to the extent necessary to assist Omnitrac in recording and perfecting its ownership interest in each such Transferred Patent.

**ARTICLE 5
GOVERNING LAW**

This Agreement is entered into in San Diego, California, and shall be governed by and construed in accordance with the laws of the State of California, United States of America, as if performed wholly within the State of California and without giving effect to any principles of conflicts of law that would result in the application of the laws of a different jurisdiction. Any dispute, claim or controversy arising out of or relating to this Agreement, or the breach or validity hereof, shall be adjudicated only by a court of competent jurisdiction located in the county of San Diego, State of California.

**ARTICLE 6
GENERAL PROVISIONS**

6.1 Headings. All headings used in this Agreement are inserted for convenience only and are not intended to affect the meaning or interpretation of any portion of this Agreement.

6.2 Counterparts. This Agreement may be executed in one or more counterparts, all of which shall be considered one and the same agreement, and shall become effective when one or more counterparts have been signed by each Party hereto and delivered to the other Parties hereto. Each Party may execute this Agreement by facsimile, stamp or mechanical signature. Each Party expressly adopts and confirms each such facsimile, stamp or mechanical signature made in its respective name as if it were a manual signature, agrees that it will not assert that any such signature is not adequate to bind such Party to the same extent as if it were signed manually and agrees that at the reasonable request of the other Party at any time it will as promptly as reasonably practicable cause this Agreement to be manually executed (any such execution to be effective as of the date of the initial date hereof or thereof). Furthermore, delivery of an executed signature page (whether executed manually or with a facsimile, stamp or mechanical signature) of this Agreement by facsimile or electronic transmission shall be effective as delivery of a manually executed counterpart hereof.

[Balance of page intentionally left blank.]

IN WITNESS WHEREOF, the Parties hereto have caused this Patent Assignment Agreement to be effective as of the Effective Date.
