WHEREAS, Buyer and Company have entered into that certain Asset Purchase Agreement dated January 13, 2020 (the "Purchase Agreement"), pursuant to which Buyer is acquiring all of Company's right, title and interest in and to substantially all of the assets of the Business (as defined in the Purchase Agreement), including the Patent Rights.

NOW, THEREFORE, to all whom it may concern be it known that for and in consideration of good and valuable consideration including consideration agreed upon between Company and Buyer under the Purchase Agreement, the receipt and sufficiency of which is hereby acknowledged, Company has sold, assigned and transferred and by these presents does hereby sell, assign and transfer unto Buyer, its successors, assigns, and legal representatives, Company's entire right, title and interest in and throughout the United States of America, its territories and all foreign countries, in and to the invention(s) described and/or claimed in the Patent Rights (the "Inventions"), together with Company's entire right, title and interest in and to the Patent Rights and such other patents as may issue thereon or claim priority under United States law or international convention, including but not limited to non-provisionals, continuations, divisionals, reissues, reexaminations, extensions, and substitutions of patents and patent applications within the Patent Rights or such other patents, and any right, title and interest Company may have in applications to which the Patent Rights claim priority; the Inventions and the Patent Rights to be held and enjoyed by Buyer for its own use and behalf and for its successors, assigns and legal representatives, to the full end of the term for which said patents may be granted as fully and entirely as the same would have been held by Company had this assignment and sale not been made; and Company hereby conveys all of its rights arising under or pursuant to any and all United States laws and international agreements, treaties or laws relating to the protection of industrial property by filing any such applications for patent, including but not limited to any cause(s) of action and damages accruing prior to this assignment. Company hereby acknowledges that this assignment, being of Company's entire right, title and interest in and to the Inventions and the Patent Rights carries with it the right in Buyer to apply for and obtain from competent authorities in all countries of the world any and all patents by attorneys and agents of Buyer's selection and the right to procure the grant of all patents to Buyer in its own name as Buyer of Company's entire right, title and interest therein;

AND, Company hereby further agrees for itself and its successors, assigns, agents, and legal representatives to execute upon request any other lawful documents and likewise to perform any other lawful acts which may be deemed necessary to secure fully the Patent Rights to Buyer, its successors, assigns, and legal representatives, as well as to third parties at the

AND, Company hereby further agrees to provide statements or testimony in any interference or other proceeding in which any of the Patent Rights may be involved;

AND, Company hereby warrants that it has not knowingly conveyed to others any rights in the Patent Rights or the Inventions or any license to use the same or to make, use or sell anything embodying or utilizing any of the Inventions, and that it has good right to assign the Inventions and the Patent Rights without encumbrance;

AND, Company does hereby authorize the Director of the United States Patent & Trademark Office, and the empowered officials of all other governments whose duty it is to record patents, applications and title thereto, to record the Patent Rights and title thereto as the property of Buyer, its successors, assigns, or legal representatives in accordance with the terms of this instrument;

AND, Company does hereby authorize and request the Director of the United States Patent and Trademark Office and the empowered officials of all other governments to issue such Patent Rights or patents as shall be granted upon the Patent Rights, or applications based thereon, to Buyer, its successors, assigns, or legal representatives;

AND, Company hereby warrants that it is the sole owner of the Patent Rights.

Buyer and Company also agree that multiple copies of this Assignment of Patent Rights may be executed, each of which shall be deemed an original, and each of which shall be valid and binding upon Buyer and Company.
