This Confirmatory Assignment of Patent Rights ("Assignment") is entered into as of 28 Dec 2018 among GLL, LLC ("GLL"), Gary L. Long ("Long") (GLL and Long collectively referred to as "Assignor") and Farapulse, Inc. ("Assignee").

**WHEREAS**, Assignee and Long are parties to a Consulting Agreement dated as of July 24, 2013 (the "Consulting Agreement") and Assignee and GLL are parties to a Services Agreement dated as of May 1, 2014 (the "Services Agreement," and together with the Consulting Agreement, the "Agreements"), for the provision of certain technical and scientific support services to Assignee by Long and GLL, respectively;

**WHEREAS**, Long is the sole member of GLL and the only person who provides the services under the Agreements;

**WHEREAS**, in connection with the services provided under one or both of the Agreements, Long contributed to the conception of one or more inventions (the "Inventions") disclosed and/or claimed in the application for patent identified below (the "Patents");

Attorney Docket IOAP-	Application S/N Filing Date	Title
015/01WO	PCT/US2018/050660 September 12, 2018	SYSTEMS, APPARATUSES, AND METHODS FOR VENTRICULAR FOCAL ABLATION

**WHEREAS**, as the sole member of GLL, Long may have assigned, and/or had an obligation to assign, inventions made during his affiliation with GLL to GLL;

**WHEREAS**, by the Agreements Long and GLL assigned, and agreed to assign, all inventions made by Long and GLL in the course of performance under the Agreements; and

**WHEREAS**, an assignment was previously executed by Long on September 17, 2018, with respect to International Patent Application No. PCT/US2018/050660, which included an incomplete identification of the application no.

**NOW, THEREFORE**, pursuant to and in confirmation of the conveyances made, and of the obligations to do so, in the Agreements, and to the extent that Assignor has not done so already via the Agreements or previously executed assignment, Assignor confirms that it has sold, assigned, transferred, and set over, and by these presents does sell, assign, transfer, and set over, unto Assignee, its successors, legal representatives, and assigns, Assignor's entire right, title, and interest in:

- (a) the Inventions;

(b) the Patents;

(c) the right to file applications for patent of the United States or other countries on the Inventions, including all rights under the Hague Convention, the Paris Convention for the Protection of Industrial Property, and under the Patent Cooperation Treaty, and all rights of claiming priority in any country of the world;

(d) any application(s) for patent of the United States or other countries claiming the Inventions;

(e) any application(s) for patent of the United States or other countries claiming priority to, and/or the benefit of, at least one of the Patents or any other application(s) for patent claiming the Inventions, including any substitute application(s), division(s), continuation(s), and continuation(s)-in-part;

(f) any provisional or other right to recover damages, including royalties, for prior infringements of any application for patent identified in the preceding paragraphs (b)-(e); and

(g) any patent(s) of the United States or other countries that may be granted for or on any application for patent identified in the preceding paragraphs (b)-(e), including any reissue(s), reexamination(s), revival(s), renewal(s) and extension(s) of said patent(s).

The above-granted rights, titles, and interests are to be held and enjoyed by the Assignee, for its own use and behalf and the use and behalf of its successors, legal representatives, and assigns, as fully and entirely as the same would have been held and enjoyed by the Assignor had this sale and assignment not been made.

Assignor hereby represents to Assignee, its successors, legal representatives, and assigns, that, at the time of execution and delivery of these presents, or at such time the Agreements were executed, Assignor is or was a lawful owner of an undivided interest in the entire right, title, and interest in and to the Inventions, that the Inventions are or were unencumbered, except, if applicable, by obligation to assign in accordance with the Agreements, and that Assignor has good and full right and lawful authority to sell and convey the same in the manner set forth herein.

Assignor hereby covenants and agrees to and with Assignee, its successors, legal representatives, and assigns, that Assignor will sign all papers and documents, take all lawful oaths, and do all acts necessary or required to be done in connection with any and all proceedings for the procurement, maintenance, enforcement and defense of the Inventions, said application(s), and said patent(s), including interference and derivation proceedings, and any post-grant proceedings (e.g., opposition proceedings, post-grant reviews, *Inter partes* reviews, supplemental examinations, etc.) without charge to Assignee, its

successors, legal representatives, and assigns, but at the cost and expense of Assignee, its successors, legal representatives, and assigns.

Assignor hereby requests the Commissioner of Patents to issue said patents of the United States to the Assignee for the sole use and behalf of the Assignee, its successors, legal representatives, and assigns.
