ASSIGNMENT

WHEREAS, the undersigned, Stephan MÜLLER, Rainer DITTMAR, Jörg CLAUBEN and Maik ALTMANN hereinafter termed "Inventors", have invented certain new and useful improvements in

PRESS FITTING FOR A PIPE JOINT AND METHOD FOR ITS MANUFACTURE

and

☐ as described in a provisional application for a United States patent disclosing and identifying the above invention on _____ as Application No. _____

☒ as described in a non-provisional application for a United States patent disclosing and identifying the above invention filed on 20 October 2020 as Application No. 17/049,310;

☒ as described in the international (PCT) application disclosing and identifying the above invention filed on 4 March 2019 as Application No. PCT/EP2019/055316,

☒ as described in the German patent application disclosing and identifying the above invention filed on 20 April 2018 as Application No. 102018109555.4,

☐ as described in a non-provisional application herewith, and

(hereinafter termed "applications"); and

WHEREAS, **Uponor Innovation AB**, a corporation of Sweden, having a place of business at **PO Box 101, Nordanovagen 2, Virsbo, 730 61 Sweden** (hereinafter termed "Assignee"), is desirous of acquiring the entire right, title and interest in and to said applications and the invention disclosed therein, and in and to all embodiments of the invention, heretofore conceived, made or discovered by said Inventors (all collectively hereinafter termed "said invention"), and in and to any and all patents, inventors' certificates and other forms of protection (hereinafter termed "patents") thereon granted in the United States and foreign countries.

NOW, THEREFORE, in consideration of good and valuable consideration acknowledged by said Inventors to have been received in full from said Assignee:

1. Said Inventors do hereby sell, assign, transfer and convey unto said Assignee the entire right, title and interest (a) in and to said applications and said invention; (b) in and to all rights to apply for foreign patents (including patent, utility model and industrial design) on said invention pursuant to the International Convention for the Protection of Industrial Property or otherwise, including the right to claim priority from the application; (c) in and to any and all applications filed and any and all patents granted on said invention in the United States or any foreign country, including each and every application filed and each and every patent granted on any application which is a divisional, substitution, continuation, or continuation-in-part of any of said applications; and (d) in and to each and every reissue or extensions of any of said patents.

ASSIGNMENT

WHEREAS, the undersigned, Stephan MÜLLER, Rainer DITTMAR, Jörg CLAUBEN and Maik ALTMANN hereinafter termed "Inventors", have invented certain new and useful improvements in

PRESS FITTING FOR A PIPE JOINT AND METHOD FOR ITS MANUFACTURE

and

☐ as described in a provisional application for a United States patent disclosing and identifying the above invention on _____ as Application No. _____

☒ as described in a non-provisional application for a United States patent disclosing and identifying the above invention filed on 20 October 2020 as Application No. 17/049,310;

☒ as described in the international (PCT) application disclosing and identifying the above invention filed on 4 March 2019 as Application No. PCT/EP2019/055316,

☒ as described in the German patent application disclosing and identifying the above invention filed on 20 April 2018 as Application No. 102018109555.4,

☐ as described in a non-provisional application herewith, and

(hereinafter termed "applications"); and

WHEREAS, **Uponor Innovation AB**, a corporation of Sweden, having a place of business at **PO Box 101, Nordanovagen 2, Virsbo, 730 61 Sweden** (hereinafter termed "Assignee"), is desirous of acquiring the entire right, title and interest in and to said applications and the invention disclosed therein, and in and to all embodiments of the invention, heretofore conceived, made or discovered by said Inventors (all collectively hereinafter termed "said invention"), and in and to any and all patents, inventors' certificates and other forms of protection (hereinafter termed "patents") thereon granted in the United States and foreign countries.

NOW, THEREFORE, in consideration of good and valuable consideration acknowledged by said Inventors to have been received in full from said Assignee:

1. Said Inventors do hereby sell, assign, transfer and convey unto said Assignee the entire right, title and interest (a) in and to said applications and said invention; (b) in and to all rights to apply for foreign patents (including patent, utility model and industrial design) on said invention pursuant to the International Convention for the Protection of Industrial Property or otherwise, including the right to claim priority from the application; (c) in and to any and all applications filed and any and all patents granted on said invention in the United States or any foreign country, including each and every application filed and each and every patent granted on any application which is a divisional, substitution, continuation, or continuation-in-part of any of said applications; and (d) in and to each and every reissue or extensions of any of said patents.

2. Said Inventors hereby covenant and agree to cooperate with said Assignee to enable said Assignee to enjoy to the fullest extent the right, title and interest herein conveyed in the United States and foreign countries. Such cooperation by said Inventors shall include prompt production of pertinent facts and documents, giving of testimony, execution of petitions, oaths, specifications, declarations or other papers, and other assistance all to the extent deemed necessary or desirable by said Assignee (a) for perfecting in said Assignee the right, title and interest herein conveyed; (b) for prosecuting any of said applications; (c) for filing and prosecuting substitute, divisional, continuing or additional applications covering said invention; (d) for filing and prosecuting applications for reissuance of any said patents; (e) for interference or other priority proceedings involving said invention; and (f) for legal proceedings involving said invention and any applications therefor and any patents granted thereon, including without limitation reissues and reexaminations, opposition proceedings, cancellation proceedings, priority contests, public use proceedings, infringement actions and court actions; provided, however, that the expense incurred by said Inventors in providing such cooperation shall be paid for by said Assignee.

3. The terms and covenants of this assignment shall inure to the benefit of said Assignee, its successors, assigns and other legal representatives, and shall be binding upon said Inventors, the inventors' respective heirs, legal representatives and assigns.

4. Said Inventors hereby warrant and represent that said inventors have not entered and will not enter into any assignment, contract, or understanding in conflict herewith.

5. Said Inventors hereby authorize the Assignee, or anyone designated by the Assignee, to insert on each page of this instrument (where indicated) the filing date and application number of said application(s) when known;

IN WITNESS WHEREOF, said Inventor has executed and delivered this instrument to said Assignee as of the date written below.

ASSIGNMENT

WHEREAS, the undersigned, Stephan MÜLLER, Rainer DITTMAR, Jörg CLAUßEN and Maik ALTMANN hereinafter termed "Inventors", have invented certain new and useful improvements in

PRESS FITTING FOR A PIPE JOINT AND METHOD FOR ITS MANUFACTURE

and

☐ as described in a provisional application for a United States patent disclosing and identifying the above invention on _____ as Application No. _____

☒ as described in a non-provisional application for a United States patent disclosing and identifying the above invention filed on 20 October 2020 as Application No. 17/049,310;

☒ as described in the international (PCT) application disclosing and identifying the above invention filed on 4 March 2019 as Application No. PCT/EP2019/055316,

☒ as described in the German patent application disclosing and identifying the above invention filed on 20 April 2018 as Application No. 102018109555.4,

☐ as described in a non-provisional application herewith, and

(hereinafter termed "applications"); and

WHEREAS, **Uponor Innovation AB**, a corporation of Sweden, having a place of business at **PO Box 101, Nordanovagen 2, Virsbo, 730 61 Sweden** (hereinafter termed "Assignee"), is desirous of acquiring the entire right, title and interest in and to said applications and the invention disclosed therein, and in and to all embodiments of the invention, heretofore conceived, made or discovered by said Inventors (all collectively hereinafter termed "said invention"), and in and to any and all patents, inventors' certificates and other forms of protection (hereinafter termed "patents") thereon granted in the United States and foreign countries.

NOW, THEREFORE, in consideration of good and valuable consideration acknowledged by said Inventors to have been received in full from said Assignee:

1. Said Inventors do hereby sell, assign, transfer and convey unto said Assignee the entire right, title and interest (a) in and to said applications and said invention; (b) in and to all rights to apply for foreign patents (including patent, utility model and industrial design) on said invention pursuant to the International Convention for the Protection of Industrial Property or otherwise, including the right to claim priority from the application; (c) in and to any and all applications filed and any and all patents granted on said invention in the United States or any foreign country, including each and every application filed and each and every patent granted on any application which is a divisional, substitution, continuation, or continuation-in-part of any of said applications; and (d) in and to each and every reissue or extensions of any of said patents.

2. Said Inventors hereby covenant and agree to cooperate with said Assignee to enable said Assignee to enjoy to the fullest extent the right, title and interest herein conveyed in the United States and foreign countries. Such cooperation by said Inventors shall include prompt production of pertinent facts and documents, giving of testimony, execution of petitions, oaths, specifications, declarations or other papers, and other assistance all to the extent deemed necessary or desirable by said Assignee (a) for perfecting in said Assignee the right, title and interest herein conveyed; (b) for prosecuting any of said applications; (c) for filing and prosecuting substitute, divisional, continuing or additional applications covering said invention; (d) for filing and prosecuting applications for reissuance of any said patents; (e) for interference or other priority proceedings involving said invention; and (f) for legal proceedings involving said invention and any applications therefor and any patents granted thereon, including without limitation reissues and reexaminations, opposition proceedings, cancellation proceedings, priority contests, public use proceedings, infringement actions and court actions; provided, however, that the expense incurred by said Inventors in providing such cooperation shall be paid for by said Assignee.

3. The terms and covenants of this assignment shall inure to the benefit of said Assignee, its successors, assigns and other legal representatives, and shall be binding upon said Inventors, the inventors' respective heirs, legal representatives and assigns.

4. Said Inventors hereby warrant and represent that said inventors have not entered and will not enter into any assignment, contract, or understanding in conflict herewith.

5. Said Inventors hereby authorize the Assignee, or anyone designated by the Assignee, to insert on each page of this instrument (where indicated) the filing date and application number of said application(s) when known;

IN WITNESS WHEREOF, said Inventor has executed and delivered this instrument to said Assignee as of the date written below.
