- 4) U.S. Patent Application No. 15/964,064 filed April 26, 2018;
- 5) U.S. Patent Application No. 16/114,190 filed August 27, 2018,

- 7) U.S. Patent Application entitled, “Controller with Situational Awareness Display,” (Appl. No. 16/163,563 filed October 17, 2018); and
- 8) U.S. Patent Application entitled, “Camera and Sensor Controls for Remotely Operated Vehicles and Virtual Environments,” (Appl. No. 16/163,565 filed October 17, 2018).

WHEREAS, I have previously assigned or agreed to assign all rights to the Inventions to FLUIDITY TECHNOLOGIES, INC. (hereinafter referred to as ASSIGNEE), incorporated in the State of Texas, having a place of business at 5207 Morningside Drive, Houston, Texas 77005;

WHEREAS, I authorize ASSIGNEE’s representative to update this document to include Patent Office information as deemed necessary (i.e., serial number, filing date, etc.);

NOW, THEREFORE, in fulfillment of my obligation, and for good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged by me, I confirm that I have assigned, sold, transferred and set over, and, to the extent I have not, do hereby assign, sell, transfer and set over, unto said ASSIGNEE, and its successors and assigns, any and all of my right, title and interest in and to (a) the Inventions and all rights in the United States, and its territories and possessions, arising thereof; (b) the Applications, including all divisions, continuations and substitutions thereof; and (c) all applications, patents (including utility patents, patents of addition, utility models, designs, and corresponding registration rights, without limitation) that issue from the Applications, or that claim any of the Inventions, including all reissues, renewals and extensions thereof, for the United States, its territories and possessions, including the right to file in the United States corresponding applications for patent on the Inventions (collectively the “Patents”); and (d) the right to claim priority under any and all

treaties and conventions, including the Paris Convention for the Protection of Industrial Property, arising from the Applications and all corresponding applications, including any division, continuation or substitution thereof, the same to be held and enjoyed by ASSIGNEE, its assigns and successors, as fully and entirely as the same would have been held and enjoyed by me, had this Assignment not been made.

I will, at any time upon the request and at the expense of the ASSIGNEE, execute and deliver any and all papers and do all lawful acts that may be necessary or desirable, in the opinion of the ASSIGNEE, to enable and assist said ASSIGNEE to (a) obtain patents, both domestic and foreign, on the Inventions, including without limitation execution of assignments of applications and priority rights and powers of attorney; (b) establish, maintain and secure title in the ASSIGNEE, its successors and assigns, to the Inventions, Applications and Patents, including making such title of lawful public record; and (c) defend, establish or otherwise preserve the validity of the Patents against any and all infringers, and perform such other acts as are necessary to give full force and effect to the foregoing assignment.

I represent and covenant that I have not made or entered into any assignment, mortgage, sale, license, pledge, encumbrance or alienation of any of my interest or rights in the Inventions, the Applications, the Patents, or any other right assigned hereunder, would conflict with this assignment.

I authorize ASSIGNEE and its representatives to insert any missing application numbers and filing dates for any of the Applications identified above when known.

I hereby authorize and request the Director of the United States Patent and Trademark Office to issue all patents based on the Applications and each division, continuation, substitution, reissue, renewal and extension thereof to the ASSIGNEE, its successors and assigns, or their respective designees.
