ASSIGNMENT AGREEMENT

Whereas, the following named inventors (each individually referred to as "INVENTOR"):

1. Miguel Angel Falagan Bobillo, a citizen of Spain, having a mailing address located at St. - Martin - Str. 53, 81669 Munich, Germany, and a resident of Munich, Germany, and
2. Andreas Detlefsen, a citizen of Germany, having a mailing address located at St. - Martin - Str. 53, 81669 Munich, Germany, and a resident of Eichenau, Bavaria, Germany,

have conceived of one or more processes, methods, machines, articles of manufacture, designs, compositions of matter, inventions, discoveries or new or useful improvements relating to: (1) "RF Module and Method for Testing and RF Module" (collectively, the "INVENTIONS"); and

WHEREAS, each INVENTOR has executed and/or may execute one or more patent applications for the INVENTIONS; and

WHEREAS, on or about February 1, 2017, in exchange of good and valuable consideration received, EPCOS AG ("EPCOS"), an entity organized under the laws of Germany having a place of business at St. - Martin - Str. 53, 81669 Munich, Germany, assigned the INVENTIONS and the Patent Items (as defined below) and all rights of priority relating to the Patent Items to SnapTrack, Inc., a corporation organized under the laws of California, having a place of business at 5775 Morehouse Drive, San Diego, California 92121, U.S.A., by execution of an instrument entitled "Master Confirmatory Patent Assignment". SnapTrack, Inc., acknowledged and accepted the purported assignment of the Patent Items and all rights of priority relating to the Patent Items. SnapTrack, Inc., now wishes to confirm that it has acquired the entire interest in said INVENTIONS and Patent Items from each INVENTOR named herein.

Now, therefore, for good and valuable consideration, the receipt of which is hereby acknowledged, each INVENTOR hereby agrees with SnapTrack, Inc., as follows.

AGREEMENT:

1. Each INVENTOR acknowledges and/or agrees to the following:
 - a. At the time of creation or conception of the INVENTIONS, each INVENTOR was employed by EPCOS, and, hence, the INVENTIONS belonged then to EPCOS,

because *inter alia* the INVENTIONS were made in the course of the normal duties of each INVENTOR and in circumstances where the INVENTIONS are reasonably expected to result from carrying out each INVENTOR's duties.

b. Further, at the outset of INVENTOR's employment with EPCOS, and prior to the date of conception of the INVENTIONS, each INVENTOR believes that INVENTOR assigned, transferred, and conveyed to EPCOS, all of INVENTOR's rights, title, and interest in and to all inventions or improvements conceived or developed by INVENTOR during the course of INVENTOR's employment by EPCOS, together with all patents and patent applications corresponding to such inventions or improvements based thereon (the "PRIOR AGREEMENT").

c. At the time of the creation or conception of the INVENTIONS, INVENTOR was solely employed by EPCOS and under no obligation to assign ownership of the INVENTIONS to any other entity.

d. By INVENTOR's PRIOR AGREEMENT, INVENTOR has previously Assigned to EPCOS all right, title, and interest in, to and under: (i) the INVENTIONS; (ii) all patent applications that have been filed or may be filed based on the INVENTIONS, including but not limited to the patent applications identified in the schedule of the exhibit attached hereto as Exhibit 1, together with all provisional and non-provisional applications relating or claiming priority thereto; (iii) all patents issuing on, from, or claiming priority to any of the patent applications that have been filed or may be filed based on the INVENTIONS, including but not limited to the patent applications identified in Exhibit 1; (iv) all reissues, reexaminations, extensions, divisions, renewals, continuations, continuations-in-part and all worldwide counterparts claiming priority to any of the foregoing items in (ii) or (iii) above, along with all patents issuing therefrom; and (v) all inventions and improvements claimed or described in the foregoing items, including but not limited to the INVENTIONS (where subsections (i), (ii), (iii), (iv), and (v) are collectively referred to as the "Patent Items"); and

e. Each INVENTOR has previously also Assigned to EPCOS all rights of priority under International Conventions, Treaties, or Agreements, and the entire right, title, and interest throughout the world in said Patent Items.

f. Each INVENTOR has been fully compensated by EPCOS for the Assignment of the INVENTIONS and the Patent Items to EPCOS under the PRIOR AGREEMENT.

2. Each INVENTOR now agrees to the following:

a. To the extent that the PRIOR AGREEMENT did not Assign INVENTOR's entire (i) rights of priority under International Conventions, Treaties, or International Agreements to EPCOS, and (ii) right, title, and interest in and to the Patent Items to

Assignment Agreement

EPCOS, INVENTOR hereby Assigns and transfers INVENTOR's entire remaining interest (if any) in and to such INVENTIONS, rights of priority, and the Patent Items, throughout the world, to SnapTrack, Inc. with an effective date of February 1, 2017. By execution of this Assignment Agreement (this "Agreement"). SnapTrack, Inc., hereby accepts such Assignment of INVENTOR's remaining interest (if any) in and to such INVENTIONS, rights of priority, and the Patent Items.

b. INVENTOR hereby Assigns and transfers to SnapTrack, Inc., any and all claims for damages and all remedies, throughout the world, arising out of or relating to any violation(s) of any of the rights assigned hereby that have or may have accrued prior to this Agreement, or that may accrue in the future, including but not limited to (i) the right to sue for, seek, obtain, collect, recover, and retain damages and any ongoing or prospective royalties to which INVENTOR may be entitled related to any of the INVENTIONS or Patent Items, and (ii) that INVENTOR may collect for any infringement or from any settlement or agreement related to any of the INVENTIONS or Patent Items.

c. INVENTOR shall communicate promptly to SnapTrack, Inc., (and its successors, legal representatives, and assigns) any facts known to INVENTOR with respect to the INVENTIONS. INVENTOR shall testify in any legal proceeding, sign all lawful papers, execute all applications and certificates, make all rightful declarations and/or oaths, and provide all lawful assistance to SnapTrack, Inc., (and its successors, legal representatives, and assigns) to obtain and enforce patent protection for said INVENTIONS or Patent Items in all countries.

d. INVENTOR authorizes and requests that the Commissioner of Patents of Germany, the Commissioner of Patents of the United States, and any Official of any country or countries foreign to Germany and the United States, whose duty it is to issue patents on applications or registrations, to issue all patents for said INVENTIONS or Patent Items to SnapTrack, Inc., (or its successors, legal representatives and assigns) in accordance with the terms of this Agreement.

e. INVENTOR covenants not to execute any writing or do any act whatsoever conflicting with this Agreement.

f. INVENTOR and SnapTrack, Inc., agree that this Agreement may be executed in multiple counterparts, each of which shall be deemed an original, and all of which together shall constitute one and the same document. A signature page delivered by electronic means shall be deemed an original for all purposes.
