**INVENTION, PATENT AND INTELLECTUAL PROPERTY ASSIGNMENT AGREEMENT**

This Invention, Patent and Intellectual Property Assignment Agreement is made this 2 day of February, 2021 by and between Garrett Biemer ("Assignor"), an individual and United States citizen residing at 8 Sanborn Ave., Boston, MA 02132, and BetMIX, LLC, a Kentucky limited liability company, having a principal place of business at: 11200 Pepper Road, Hunt Valley, MD 21031 ("Assignee"):

WHEREAS, Assignor is or was an employee, contractor, or other service provider to Assignee; and

WHEREAS, Assignor participated in the development of an invention, which is the subject of, but is not limited solely to the invention described or otherwise embodied in, the U.S. Provisional Patent Application tentatively titled "Method and System for Compiling Performance Metrics for Racing Competitors" a draft of which is attached hereto and incorporated herein by reference (the "Patent Application"). The invention embodied in the Patent Application is generally described as a means for analyzing the digital video data of races around a racetrack to compute the performance metrics (e.g., speed exhibited during various portions of a race) that various competitors have exhibited during their prior races, training sessions or even a current race. Such performance metrics can be used by potential wagerers or bettors to help their efforts to handicap current or upcoming races in which these racing competitors will be competing; and

WHEREAS, Assignor and Assignee desire to confirm the assignment to Assignee of all present and future rights, title, and interest in and to the Patent Application, including but not limited to all rights, title, and interest in and to all patent, copyright, trade secret, trademark and other proprietary rights embodied in, evidenced by or otherwise described in the invention described in the Patent Application, and all derivatives, modifications and enhancements thereof (collectively "IP Rights");

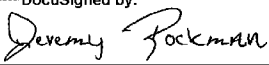

NOW, THEREFORE, for good and valuable consideration of the mutual promises herein and one dollar in hand paid, the receipt and sufficiency of which are hereby acknowledged, the parties agree as follows:

1. Assignor hereby assigns and transfer unto Assignee, its successors and assigns, and automatically assigns and transfers in the future without additional action, the entire right, title and interest in and to all IP Rights, including all IP Rights in the Patent Application and the invention therein, including but not limited to all derived patents as that term is defined in 35 USC § 291(a), patent divisions, re-issues, revivals, continuations or continuations-in-part, substitute patent applications, and extensions thereof, in the United States and everywhere in the world (including but not limited to the right to apply for Letters Patents or the equivalent in foreign countries in the Assignee's own name and to claim any priority rights for such foreign applications to which such applications are entitled under international conventions, treaties, or otherwise).
2. Assignor does further agree to execute and deliver without further consideration any further applications, assignments and documents, and to perform such other acts as Assignee reasonably may request, that may be deemed necessary by Assignee, its successors, assigns and nominees, fully to secure Assignee's interest as aforesaid and to obtain or maintain Letters Patents in any and all countries. If Assignor fails, refuses or is otherwise unable to execute such documents, the Assignor hereby appoints the then president of the Assignee as its due and lawful attorney in fact with the power of attorney to execute such documents and take such acts under this paragraph as Assignor was required to execute or take, such power being coupled with an interest herein and irrevocable.
3. Assignor does hereby authorize and request the Commissioner of Patents and, in the event foreign patent applications are filed, the heads of the foreign patent granting entities where foreign patent applications are filed, to reflect on the public record ownership in the Assignee of the entire right, title and interest in the Invention.

Once this Assignment is signed and delivered, any reproduction of this Assignment made by reliable means (for example, .pdf or .TIFF format) will be considered an original.

IN WITNESS WHEREOF, the parties have signed their names on the day and year set forth above.
