WHEREAS, we, David K. Stevens, Mark R. Tonjes, Lindsay D. Dreitzler, Jane A. Newman-Ford, and Alan D. Mosher (the "Assignors"), have invented certain new and useful improvements entitled:

### *Method and Consolidated Apparatus for Recovery of Sulfur from Acid Gases*

for which a provisional patent application was filed in the United States Patent & Trademark Office on the 22<sup>nd</sup> day of July, 2009, Serial No. 61/227,568; and

WHEREAS, KPS Technology & Engineering LLC, a Kansas limited liability company, with its principal office at 8500 West 110<sup>th</sup> Street, Suite 400, Overland Park, Kansas 66210, United States of America (the "Assignee"), is desirous of acquiring the entire right, title, and interest in and to the aforesaid invention, including any tangible materials embodied in or encompassed by the invention and any trade secrets pertaining to the invention, and any improvements thereon, (the "Invention") and in and to said applications for Letters Patent thereon in the United States of America, its territories, and possessions ("United States") and all foreign countries, including rights to claim priority, to any provisional applications, and in and to any Letters Patent of the United States or any foreign country which may be granted therefor, including any and all reissues, divisions, continuations, continuations-in-part, renewals, substitutes, modifications, improvements, or extensions thereof (the "Rights");

NOW, THEREFORE, for and in consideration of good and valuable consideration in exchange of this assignment, the receipt of which is hereby acknowledged, Assignors have sold, assigned, transferred, and conveyed, and each does hereby sell, assign, transfer, and convey to Assignee, its successors and assigns, the entire right, title, and interest in and to the aforesaid Invention and Rights. The aforesaid assignment includes the right in and to all income, royalties, damages, and payments now or hereafter due or payable with respect to any Letters Patent that may be granted, and in and to all causes of action (either in law or in equity), and the right to sue, counterclaim, and recover for past, present, and future infringement of the rights assigned or to be assigned under this Assignment, as fully and entirely as the same would have been held and enjoyed by Assignors jointly and severally if this sale and assignment had not been made.

Assignors jointly and severally hereby represent, warrant and covenant that they have the full right to convey the entire interest herein assigned, that they have not executed and will not execute any instrument or assignment in conflict herewith, and that the rights assigned herein are not otherwise encumbered by any grant, license, or right. Assignors hereby authorize and request the appropriate governmental officials to issue any and all such United States or foreign Letters Patent under said invention, or resulting from any of said applications thereof, to the Assignee, as the assignee of the entire right, title, and interest in and to the same.

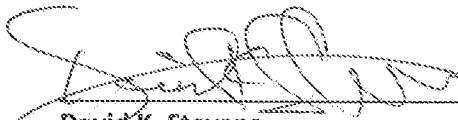

Assignors jointly and severally further covenant and agree that Assignors will at any time upon request make, execute, and deliver without further compensation, but at the expense of the Assignee, any and all other instruments in writing, including further applications, papers, affidavits, power of attorney, assignments, and other documents, and do all lawful acts and things, that, in the opinion of counsel for said Assignee, its successors, and assigns, may in any country be required or necessary more

effectively to secure to and vest in said Assignee, its successors and assigns the entire right, title, and interest in and to said Invention and Rights hereby sold, assigned, transferred, and conveyed, and that Assignors will sign any applications for reissue, division, continuation, continuation-in-part, renewal, substitute, modification, improvement, or extension, of said application for Letters Patent or any resulting Letters Patent;
