PATENT ASSIGNMENT

This PATENT ASSIGNMENT (the "Assignment") is made effective as of March 2, 2020 (the "Effective Date"), by and between Abaxis LLC, a California limited liability company (which was formed on the conversion of Abaxis, Inc., a California corporation, on February 26, 2020 into a limited liability company), located at 3240 Whipple Road, Union City, CA 94587, United States of America ("Assignor") and Zoetis Services LLC, a limited liability company organized under the laws of Delaware, located at 10 Sylvan Way, Parsippany, NJ 07054, United States of America ("Assignee"). Assignor and Assignee may be referred to herein individually as a "Party" and collectively as the "Parties." Capitalized terms used but not defined herein shall have the meaning ascribed to such terms in the Transfer Agreement (as defined herein).

RECITALS:

WHEREAS, pursuant to the Asset Transfer Agreement, effective as of March 2, 2020, by and between Assignor and Assignee (the "Transfer Agreement"), Assignor is assigning to the Assignee all of Assignor's right, title and interest in, to and under the issued patents and patent applications identified on Schedule A hereto (collectively, the "Assigned Patent Rights").

NOW, THEREFORE, for good and valuable consideration the receipt of which is hereby acknowledged and in consideration of the mutual agreements, provisions and covenants contained in this Assignment, the Parties, intending to be legally bound, hereby agree as follows:

1. **Conveyance.** Assignor hereby transfers, conveys and assigns to Assignee its entire right, title and interest in, to and under (a) the Assigned Patent Rights, for the United States and for all foreign countries, including any and all (i) divisionals, continuations, and continuations-in-part that claim priority to any Assigned Patent Rights to the extent the claims thereof are entirely supported by such Assigned Patent Rights, (ii) reissues, renewals, re-examinations, substitutions, extensions, or additions of the Assigned Patent Rights, (iii) foreign equivalents of the Assigned Patent Rights, and (iv) rights to apply for, prosecute and obtain patents in respect of any of the inventions to the extent fully supported by the Assigned Patent Rights in any country of the world, including the right to claim priority from the Assigned Patent Rights under the Paris Convention for the Protection of Industrial Property, and under any and all other applicable treaties and agreements which afford similar priority- claiming privileges, in all countries of the world, and (b) the right to sue for and to recover damages and other remedies in respect of any past, present or future infringement or other unauthorized use or violation of the Assigned Patent Rights.
2. **Issuance and Recordation.** Assignor hereby authorizes and requests the Commissioner of Patents and Trademarks of the United States and any official of any foreign country whose duty it is to issue patents on applications as described above, to issue any and all Assigned Patent Rights to Assignee, its successors and assigns, in accordance with the terms of this Assignment. Assignor hereby requests the Commissioner of Patents and Trademarks, and the corresponding entities or agencies in any applicable foreign jurisdiction, to record Assignee as the assignee and owner of the Assigned Patent Rights. Assignee shall have the right to record this Assignment with all applicable government authorities and registrars so as to perfect its ownership of the Assigned Patent Rights.

3. **No Modification.** Nothing contained in this Assignment is intended to or shall be deemed to modify, alter, amend or otherwise change any of the rights or obligations of Assignee or Assignor under the Transfer Agreement. Without limiting the foregoing, in the event and to the extent that there shall be a conflict between the provisions of this Assignment and the provisions of the Transfer Agreement, the Transfer Agreement shall control.
4. **Successors and Assigns.** This Assignment shall be binding upon and inure to the benefit of the Parties and their respective successors and permitted assigns.
5. **Counterparts.** This Assignment may be executed in one or more counterparts, each of which shall be deemed an original, and all of which shall constitute one and the same agreement and shall become effective when one or more counterparts have been signed by each of the Parties and delivered to the other Party, it being understood that both Parties need not sign the same counterpart.
6. **Interpretation.** The Article and Section headings contained in this Assignment are solely for the purpose of reference, are not part of the agreement of the Parties and shall not in any way affect the meaning or interpretation of this Assignment.
7. **Further Assurances.** Assignor and Assignee hereby covenant and agree, without the necessity of any further consideration, to execute, acknowledge, and deliver any and all such other documents and take any such other action as may be reasonably necessary or appropriate to implement this Assignment and carry out the intent and purposes of this Assignment.
8. **Governing Law.** This Assignment is governed by and construed in accordance with the laws of the State of New York, without regard to its conflict of law rules (other than Sections 5-1401 and 5-1402 of the New York General Obligations Law).
9. **Jurisdiction.** With respect to any suit, action or proceeding relating to this Assignment, each Party hereto irrevocably agrees and consents to be subject to the exclusive jurisdiction of the courts of the State of New York and any court of the United States located in the Borough of Manhattan in New York City; (b) waives any objection which such Party may have at any time to the laying of venue of any action brought in any such court, waives any claim that such action has been brought in an inconvenient forum and further waives the right to object, with respect to such action, that such court does not have jurisdiction over such Party; and (c) consents to the service of process at the address set forth for notices in the Transfer Agreement; provided, however, that such manner of service of process shall not preclude the service of process in any other manner permitted under applicable law.
