invented by us, including, but not limited to, all other embodiments and versions thereof, and all improvements, changes, revisions and modifications thereto (collectively, "the Invention"), and to any United States and foreign patent applications filed for and patents to be obtained for the Invention, including, without limitation, all of the applications listed on Exhibit A hereto, any and all utility and design applications and registrations for the Invention and all applications, continuations, divisionals, continuations-in-part, re-issues, reexaminations, extensions and all other rights in and to the Invention and all U.S. and foreign applications and patents for the Invention and/or claiming priority to or from any of the foregoing, the said interest being the entire ownership of the Invention, said U.S. Letters Patent and any foreign Letters Patent when granted, to be held and enjoyed by said Transshield, Inc., its successors, assigns or other legal representatives, to the full end of the term for which said Letters Patents may be granted, as fully and entirely as the same would have been held and enjoyed by us if this assignment and sale had not been made.

We hereby agree to sign and execute any further documents or instruments which may be useful or necessary in the prosecution of the above-named applications or in the preparation and prosecution of any continuing, continuation-in-part, substitute, divisional, renewal, reexamination or reissue applications or in any amendment, as well as any other papers useful or necessary to procure U.S. and foreign patents on said Invention, and/or to secure recordable title thereto in Transshield, Inc. throughout the world. This Assignment is effective as of July 19, 2017.
