ASSIGNMENT

ASSIGNOR: Ken Bretschneider

ASSIGNEE: VR EXIT, LLC
2506 Barcelona Drive
For Lauderdale, FL 33301

INVENTION: Team flow control in a mixed physical and virtual reality environment

ATTORNEY DOCKET: 4745/1009

APPLICATION NO.: 15/624,716

FILING DATE: June 16, 2017

Assignor is a joint inventor of a certain new and useful invention (the "Invention") described in a patent application (the "Application") filed with the U.S. Patent & Trademark Office bearing the above attorney docket number and the above application number and having as a title the above name for the Invention. At the time of Assignor's contribution to the Invention, Assignor was a founder and an employee of The Void LLC, of Lindon, Utah, and was subject to contractual obligations, such as those set forth in The Void LLC's operating agreement, its IP policy and its standard form of confidentiality, non-solicitation and non-competition agreement (collectively, the "Agreements"), obliging him to assign to The Void LLC all inventions invented by him either solely or jointly with others in the course of his employment. As of February 23, 2021, the Void LLC assigned to VR Exit LLC ("Assignee") all of its contractual rights, including those arising under the Agreements, to require Assignor to execute assignments of the Invention to it. That assignment is recorded at the US Patent and Trademark Office at reel 055389 frame 0386. Assignor hereby confirms and agrees that the Invention was conceived in connection with his employment with The Void LLC.

In consideration of the foregoing, and for valuable consideration receipt of which is acknowledged, Assignor hereby assigns to Assignee (which term shall include Assignee's successors and assigns), all of Assignor's right, title and interest in the Invention, all improvements therein, the Application and all priority rights arising therefrom, and any patents, and any reissues and extensions thereof, which issue in any country upon any patent applications which correspond with any of the following: the Application, any divisional, continuation-in-whole, or substitute United States application which is based on the Application; or any continuation-in-part United States application (including divisions, continuations-in-whole or -in-part, and substitutions thereof or therefor) based in-part on any of the above described applications; and Assignee accepts that assignment.

Assignor further agrees that he will, without further consideration, cooperate with Assignee, its successors and assigns, in the prosecution of all of the above applications, execute, verify, acknowledge and deliver all such further papers, including applications for patents and for reissues, extensions, and instruments of assignment and transfer thereof, and will communicate any facts known to Assignor relating to the Invention, to obtain or maintain or enforce patents for the Invention and improvements therein in any and all countries and to vest title thereto in Assignee. Assignor further agrees that such Assignor will, for reasonable compensation perform such other acts as may be reasonably required when requested by Assignee, including attending depositions, preparing and executing declarations and affidavits and testifying as a witness, to obtain or maintain or enforce patents for the Invention and improvements therein in any and all countries and to vest title thereto in Assignee.

Assignor hereby authorizes and requests Sunstein LLP to supply any missing patent/application identification information or correct any errors in the patent/application identification information provided above, whether discovered prior to or after recordation.

By executing this Assignment, Assignee accepts the assignment set forth above.

Assignor and Assignee agree that this instrument may be executed in any number of counterparts, each of which shall be deemed to be an original and all of which together shall constitute one and the same agreement; and that an original signature or a copy thereof transmitted by facsimile or by PDF shall constitute an original signature for purposes of this instrument.
