WHEREAS, we, Jay A. Fuhr, a citizen of the United States, residing at 1137 Edgewood Dr., Hummelstown, Pennsylvania and Tyler Rhys Waylett, a citizen of the United States of America, residing at 1301 Twisting Star Drive, Haslett, Texas, have invented certain new and useful improvements in a Rechargeable Battery System described in U.S. Patent Application 16/159,017 ("the '017 application"); and

WHEREAS, we, Jay A. Fuhr, trustee of the J A Fuhr Family Trust and Tyler Rhys Waylett (together hereinafter referred to as "Assignees"), are together desirous of acquiring the entire right, title and interest in '017 application, and in and to said application and any Letters Patent that may issue thereon, in equal one-half shares;

NOW, THEREFORE, for and in good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, I do hereby sell, assign and transfer unto said Assignees, their successors, assigns and legal representatives the full and exclusive right, title and interest in and to said invention and in and to said application and all patents which may be granted therefor, and all divisions, reissues, substitutions, continuations, continuations-in-part and extensions thereof; and I hereby authorize and request the Commissioner of Patents to issue all patents for said invention, or patents resulting therefrom, insofar as my interest is concerned, to said Assignees of my entire right, title and interest.

I also hereby sell and assign to said Assignees, their successors, assigns and legal representatives the full and exclusive right, title and interest to the invention disclosed in said application throughout the World, including the right to file applications and obtain patents, utility models, industrial models and designs for said invention in its own name throughout the World including all rights of priority, all rights to publish cautionary notices reserving ownership of said invention and all rights to register said invention in appropriate registries; and I further agree to execute any and all powers of attorney, applications, assignments, declarations, affidavits, and any other papers in connection therewith necessary to perfect such right, title and interest in Assignees, their successors, assigns and legal representatives.

I hereby further agree that I will communicate to said Assignees, or to their successors, assigns and legal representatives, to testify in any legal proceedings, sign all lawful papers, execute all divisional, continuation, continuation-in-part, reissue and substitute applications, make all lawful oaths, and generally do everything possible to vest title in said Assignees and to aid said Assignees, their successors, assigns and legal representatives to obtain and enforce proper protection for said invention in all countries. However, I have no obligation to assign previous inventions or subsequent improvements to the Rechargeable Battery System under this agreement.

The Assignees do hereby jointly agree to not transfer any interest in or license the invention disclosed in said application, in the United States and throughout the World, without the written consent of both Assignees, and that each Assignee shall be entitled to accounting for any revenue received, and for profits, if any, made from the invention, for the term of any patents which may issue for the invention, in the United States and throughout the World.
