INTELLECTUAL PROPERTY ASSIGNMENT AGREEMENT

This Intellectual Property Assignment Agreement (this "Assignment") is effective as of the Closing Date (as hereinafter defined) by and between Sapphire Medical, Inc., a Delaware corporation ("Assignor") and C2M Medical, Inc., a Delaware corporation ("Assignee").

WHEREAS, Assignor and Assignee are parties to that certain Asset Purchase Agreement (the "APA"), dated as of April 17, 2007, pursuant to which Assignor shall transfer to Assignee the intellectual property described in Schedule 5(a)(vii)(A) the APA (the "Intangibles");

WHEREAS, Assignee desires to acquire from Assignor, and Assignor desires to transfer to Assignee, the Intangibles, pursuant to the terms and conditions provided in this Assignment;

NOW, THEREFORE, in consideration of the parties' mutual covenants and agreements set forth herein and in the APA, and for other good, valuable and adequate consideration received, the parties agree as follows:

1. Assignment. Assignor hereby sells, assigns, conveys, transfers, grants, sets over, and relinquishes to Assignee and its successors and assigns any and all of Assignor's rights, title, and interest in, to, and under the Intangibles, which Intangibles shall include, but is not limited to, the intellectual property set forth in Schedules A and B attached hereto, as well as the right to sue for all causes of action, rights, and remedies arising under any of the foregoing (all of the preceding collectively referred to as the "Assigned Rights").
2. Patent and Trademark Office Authorization. Assignor hereby authorizes and requests the United States Commissioner of Patents and Trademarks and any officials of foreign countries whose duty it is to issue patents, trademarks, copyrights or any legal equivalent thereof to issue any and all patents, trademarks, copyrights (or their legal equivalents) on the Assigned Rights or any applications described in this Assignment to Assignee and its successors and assigns, in accordance with this Assignment. Assignor further grants and transfers unto Assignee power to cause Assignee's name to be substituted for Assignor's name as applicant for registrations on the Assigned Rights, when Assignee reasonably determines it is necessary or required and at Assignee's expense, so that applications for registrations on any Assigned Rights may proceed in the name of Assignee.
3. Registration and Enforcement. In furtherance of this Assignment, Assignor hereby acknowledges that, from the Closing Date forward, Assignee has succeeded to all of Assignor's rights, title, interest, and standing (i) to institute and prosecute all suits and proceedings or take any actions that may be necessary or proper to collect, assert, or enforce any claim, right, title, or cause of action of any kind under any and all of the Assigned Rights, whether arising before or after the Closing Date, (ii) to defend and compromise any and all such actions, suits, or proceedings relating to the Assigned Rights, and (iii) to exploit the Assigned Rights as one sees fit.
4. No Modification to APA. This Assignment is delivered in connection with the APA and is subject in all respects to the provisions thereof and is not meant to alter, enlarge or otherwise modify the provisions of the APA.

5. Further Assurances. Assignor shall (i) at Assignee's request, provide Assignee with all known, pertinent facts and documents, including, but not limited to, prosecution histories and files, under such Assignor's custody, possession, or control relating to the Assigned Rights, and (ii) execute and deliver to Assignee or its legal representative any and all papers, instruments, or affidavits required to implement or perfect this Assignment or to apply for, obtain, prosecute, and maintain registrations of the Assigned Rights.
6. Binding Effect. This Assignment and the covenants and agreements herein contained shall be binding upon and inure to the benefit of each party and its successors and assigns.
7. Amendments. This Assignment may be amended only by a writing executed by all of the parties hereto.
8. Counterparts. This Assignment may be executed in any number of counterparts, each of which shall be deemed to be an original, and all of which together will constitute one and the same instrument.
