WHEREAS, prior to the Assignment, Assignor was the owner of all rights, title and interest to United States Patent No. RE 46,596 E, entitled "Developer Cartridge with Counting Mechanism," issued on October 31, 2017 (hereafter the "Patent Property"); and

WHEREAS, it was the intent of Assignor and Assignee (the "Parties") to transfer the entire right, title and interest in and to the Patent Property from Assignor to Assignee, pursuant to the Assignment, including the right to recover for any past or future damages based upon infringement of the Patent Properties or otherwise, regarding activity that occurred prior to the Assignment;

WHEREAS, the Parties desire to enter into this Supplemental Patent Assignment (this "Agreement") to ensure that the full intent of the Parties is accomplished;

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, to the extent that the Assignor possesses any of the rights delineated below and to ensure that the full intent of the Parties is accomplished, Assignor does hereby sell, assign, transfer and set over to Assignee, all its right, title and interest in and to the Patent Property, as well as all continuations, divisions, and continuations-in-part of said Patent Property, and all reissues and extensions thereof, the same to be held and enjoyed by Assignee for its own use and benefit, and for the use and benefit of its successors, assigns, or legal representatives, to the end of the term or terms for which such Patent Property may be granted or reissued, as fully and entirely as the same would have been held and enjoyed by Assignor if this assignment and sale had not been made.

Assignor also assigns to Assignee, all right, title and interest in and to the inventions claimed in said Patent Property throughout the world, including the right to file applications and obtain patents, utility models, industrial models and designs for said Patent Property in its own
