PATENT ASSIGNMENT AGREEMENT

This Patent Assignment Agreement (“**Assignment**”) is made by and between Cree, Inc., a North Carolina corporation having its principal offices at 4600 Silicon Drive, Durham, North Carolina 27703, USA (“**Assignor**”), and CreeLED, Inc. (f/k/a Chili Acquisition, Inc.), a Delaware corporation having its principal offices at 39870 Eureka Drive, Newark, CA 94560, USA (“**Assignee**”), as of the date set forth below.

WHEREAS, Assignor is selling to Assignee, contemporaneously with the execution and delivery of this Assignment at a closing on the date hereof, the Acquired Assets (as defined in the Purchase Agreement) pursuant to the Asset Purchase Agreement dated as of October 18, 2020, as amended, among Assignee, SMART Global Holdings, Inc., a Cayman Islands exempted company of which Assignee is a wholly-owned subsidiary, and Assignor (the “**Purchase Agreement**”) and the Intellectual Property Assignment and License Agreement dated as of the date hereof, between Assignee and Assignor (the “**IPALA**”), providing for, among other things, the sale to Assignee or an Affiliate of Assignee by Assignor of all of Assignor’s right, title and interest in and to the Assigned Patents (as set forth below);

WHEREAS, the term “**Patents**” means all United States, international and foreign patents, utility models, industrial rights and applications therefor, and all reissues, reexaminations, divisions, divisionals, renewals, extensions, provisionals, continuations and continuations-in-part thereof, and all patents, applications, registrations and filings claiming priority to or serving as a basis for priority thereof;

WHEREAS, the term “**Assigned Patents**” means (a) the patents and patent applications identified on Exhibit A; (b) any and all Patents, where U.S. or non-U.S., issuing on or arising from Patents included in (a); (c) all Patents claiming priority to any of the Patents covered by (a) or (b) above; (d) with respect to all of the foregoing, all renewals, reissues, extensions (or other governmental actions that provide exclusive rights to the owner thereof in the patented subject matter beyond the original expiration date), substitutions, confirmations, registrations, revalidations, reexaminations, additions, continuations, continued prosecutions, requests for continuing examinations, continuing prosecution applications, continuations-in-part, and divisions of or to any of the foregoing, and all results of oppositions, reexaminations, supplemental examinations, and other review procedures (including ex parte reexamination, inter partes review, post grant review, and covered business method (CBM) review), and all Patents issuing on or arising from any of the foregoing, and all foreign counterparts of any of the foregoing; and (e) all registrations of any of the foregoing including supplementary protection certificates or the equivalent thereof in any and all countries;

WHEREAS, Assignee is desirous of acquiring all of Assignor’s right, title and interest in and to the Assigned Patents;

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Assignor does hereby unconditionally and irrevocably sell, assign, transfer, convey and deliver to Assignee, free and clear of all liens, encumbrances, rights and claims of any third party except for such permitted liens and encumbrances as expressly provided in the Purchase Agreement, IPALA, and other agreements entered into pursuant thereto, Assignor’s entire right, title and interest in and to all of the following, throughout the world, whether existing now or in the future:

- (a) the Assigned Patents;
- (b) all inventions described in any of the Assigned Patents that (i) are included in any claim in the Assigned Patents, or (ii) are disclosed in an enabling manner in any of the Assigned Patents;

(c) all rights to apply for, file prosecute, register, maintain, extend and renew, in any and all countries of the world (i) Patents and other governmental grants or issuances of any type that claim any of the inventions described in (b), and (ii) the Assigned Patents; and

(d) to the extent they exist, any and all remedies, claims, causes of action and other enforcement rights of any kind (whether known or unknown or whether currently pending, filed, or otherwise, and whether accrued or accruing in the past, present or future) under, pursuant to, or on account of, any of the Assigned Patents or the rights described in (c), including all causes of action and other enforcement rights for (i) all past, current, and future damages, (ii) injunctive relief, and (iii) any other remedies of any kind for past, current, and future infringement.

Assignor also hereby authorizes the respective patent office or governmental agency in each jurisdiction to issue any and all patents or certificates of invention which may be granted upon any of the Assigned Patents in the name of Assignee, as the assignee of the entire interest therein.
