WHEREAS, each Inventor has created one or more inventions, discoveries, or improvements (“**Inventions**”) described and/or claimed in the following application filed in the United States Patent and Trademark Office (“**USPTO**”):

Title:	PACKAGING CONTAINER
Application No.	29/783,921
Filing Date:	May 17, 2021

WHEREAS, the Assignee, together with its successors and assigns, desires to acquire the entire right, title and interest in and to the Inventions and Applications (as defined herein).

NOW, THEREFORE, the parties agree as follows:

1. Assignment. For good and valuable consideration from the Assignee to each Inventor, the receipt and sufficiency of which are hereby acknowledged, each Inventor hereby irrevocably conveys, transfers and assigns to the Assignee and its lawful successors and assigns, the entire and exclusive right, title, and interest in and to the following (“**Acquired Rights**”): the Inventions (whether or not patentable) and all existing or future patents and patent applications (whether provisional or non-provisional) from which any of them claim priority or that claim priority from any of them, including conversions, divisionals, continuations, continuations-in-part, substitutions, reissues, reexaminations, extensions, renewals or restorations of any of the foregoing, and other indicia of invention ownership (including certificates of invention, petty patents, and patent utility models) and all similar or equivalent rights or forms of protection provided by applicable law of any jurisdiction, by international treaties and conventions, and otherwise throughout the world

(collectively, "**Applications**"), and any and all rights in, arising out of, or associated with any of the foregoing, including, but not limited to, any and all royalties, profits, damages, fees, income, payments, and other proceeds now or hereafter due or payable, and any and all claims and causes of action with respect to any of the foregoing, whether accruing before, on, or after the date hereof, including all rights to and claims for damages, restitution, and injunctive and other legal and equitable relief for past, present, and future infringement, dilution, misappropriation, violation, misuse, breach, or default, with the right but no obligation to sue for such legal and equitable relief and to collect, or otherwise recover, any such damages.

2. No Conflicts. Each Inventor represents and warrants as having the ability to convey all rights and interests herein assigned, that there are no rights or interests outstanding inconsistent with the rights and interests granted herein, and as not having executed any instrument or granted or transferred any rights or interests inconsistent with the rights and interests granted herein.

3. Recordation. Each Inventor authorizes the Commissioner for Patents in the USPTO and the officials of corresponding entities or agencies in any applicable jurisdictions to record and register this Assignment upon request of the Assignee, and the Assignee to file for and request that the USPTO and corresponding entities or agencies in any applicable jurisdiction issue any and all patents and registrations resulting from any of the Applications to the Assignee.

4. Further Assurances. Each Inventor shall take such steps and actions, execute and deliver such additional documents, instruments, conveyances, and assurances, and provide such cooperation and assistance, to the Assignee and its successors, assigns, and legal representatives, at the Assignee's expense, as may be useful or necessary to carry out the provisions hereof and give effect to the transaction contemplated by this Assignment and the documents to be delivered hereunder. Without limiting the foregoing, each Inventor shall take such steps and actions, and provide such cooperation and assistance, to the Assignee and its successors, assigns, and legal representatives, in connection with the Inventions and the Applications, or for any inventions, discoveries, and improvements derived therefrom, as may be useful or necessary to effect, evidence, and perfect this Assignment, and to vest in the Assignee or any assignee or successor thereto, all right, title, and interest in and to the Acquired Rights in accordance with applicable law, and to apply for, obtain, maintain, protect, and enforce the same, including, but not limited to, giving testimony, obtaining and producing evidence, and executing and delivering to the Assignee any and all affidavits, declarations, oaths, applications, exhibits, waivers, assignments, powers of attorney, and other documents and instruments as may be requested by the Assignee.

This power of attorney is coupled with an interest and shall not be affected by Inventor's subsequent incapacity.

6. Further Identification Authorization. Each Inventor hereby grants the Assignee and its successors, assigns, and legal representatives, the power to insert on this Assignment any further identification information, including an application number and filing date, which may be necessary or desirable.

7. Successors and Assigns. This Assignment inures to the benefit of the Assignee and its successors, assigns, and other legal representatives, and is binding on each Inventor and its respective heirs, legal representatives, and assigns.
