INTELLECTUAL PROPERTY ASSIGNMENT AGREEMENT

THIS INTELLECTUAL PROPERTY ASSIGNMENT AGREEMENT (this “IP Assignment”), dated as of May 18, 2021, by and between Bond Manufacturing Co., Inc., a California corporation (the “Assignor”), and GHP Group, Inc., a Delaware corporation (“Assignee”).

W I T N E S S E T H

WHEREAS, pursuant to that certain Asset Purchase Agreement, dated as of May 18, 2021, by and among Assignor, Assignee and certain other parties thereto (the “Purchase Agreement”), Assignor desires to assign to Assignee all of Assignor’s right, title and interest in and to the Purchased Property, including certain registered intellectual property and applications for registration of intellectual property, including the patents and patent applications set forth on the attached Schedule A (collectively, the “Patents”), the trademark registrations and trademark applications set forth on the attached Schedule B, including common law rights to the extent available under Applicable Law (collectively, the “Trademarks”), the copyright registrations and copyright applications set forth on the attached Schedule C (collectively, the “Copyrights”), and the domain name registration set forth on the attached Schedule D (collectively, the “Domain Names”).

WHEREAS, the parties wish to execute and deliver this IP Assignment for the purpose of assigning all of Assignor’s right, title and interest in and to the Patents, Trademarks, Copyrights, and Domain Names from Assignor to Assignee; and

WHEREAS, the terms of the Purchase Agreement are incorporated herein by reference and capitalized terms used herein and not otherwise defined shall have the meaning ascribed thereto in the Purchase Agreement.

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Parties hereby agree as follows:

1. Assignor does hereby irrevocably sell, convey, assign, deliver, and transfer to Assignee, its successors, assigns and legal representatives, and Assignee purchases and accepts from Assignor, all of Assignor’s right, title and interest in and to (i) the Patents, including any and all rights of priority thereto and renewals thereof, issuances, divisions, continuations, continuations-in-part, reissues, extensions, reexaminations and renewals thereof, and all patents and patent applications to which any of the Patents claim priority and all patents and patent applications claiming priority to any of the foregoing, (ii) the Trademarks, including all goodwill associated therewith and symbolized thereby, and any and all rights of priority thereto and issuances, extensions and renewals thereof, (iii) the Copyrights, including any and all rights of priority thereto and issuances, extensions and renewals thereof, (iv) the Domain Names, including the right to renew such registrations, (v) all rights of any kind whatsoever of Assignor accruing under any of the foregoing provided by applicable law of any jurisdiction, by international treaties and conventions and otherwise throughout the world. With respect

to the United States intent-to-use trademark applications set forth on the attached Schedule B, the transfer of such applications accompanies the transfer of Assignor's business, or portion of the business to which the Trademarks pertain, and that business is ongoing and existing.

2. Assignor consents to recordation of this IP Assignment by Assignee, including with the United States Patent and Trademark Office, the United States Copyright Office, and other similar foreign offices. Assignor hereby authorizes the United States Patent and Trademark Office, the United States Copyright Office and/or the appropriate empowered officials in relevant jurisdictions outside the United States to transfer all ownership rights in and to the Patents, Trademarks and Copyrights to Assignee as assignee of Assignor's entire right, title and interest therein or otherwise as Assignee may direct, in accordance with this instrument of assignment.

3. Assignor shall provide such cooperation and assistance to Assignee and its successors, assigns and legal representatives, including the execution and delivery of further conveyance instruments, affidavits, declarations, oaths, exhibits, assignments, powers of attorney, or other documents, and take such further actions as may be reasonably necessary to perfect or evidence more fully the present transfer of the Patents, Trademarks, Copyrights, and Domain Names, including, without limitation and at Assignee's expense (i) completing all automated procedures and documentation as may be reasonably required to effectuate the transfer of the Domain Names, and (ii) providing testimony in connection with any proceeding affecting the right, title, or interest of Assignee in the Patents, Trademarks, Copyrights and/or the Domain Names.

4. This IP Assignment does not create or establish liabilities or obligations not otherwise created or existing under or pursuant to the terms and conditions set forth in the Purchase Agreement. Nothing in this IP Assignment, express or implied, is intended to or shall be construed to supersede, modify, replace, amend, rescind, waive, expand, or limit in any way the rights of the parties under, or the terms of, the Purchase Agreement, or the Transaction Documents. In the event of any conflict between the Purchase Agreement and this IP Assignment, the provisions of the Purchase Agreement shall control.

5. The above-granted rights, titles, and interests are to be held and enjoyed by the Assignee, for its own use and behalf and the use and behalf of its successors, legal representatives, and assigns, as fully and entirely as the same would have been held and enjoyed by the Assignor had this sale and assignment not been made.

6. The officer that executes this IP Assignment on behalf of Assignor is authorized to bind and obligate each of the entities defined herein as part of Assignor. The officer that executes this IP Assignment on behalf of Assignee is authorized to bind and obligate the entity defined herein as Assignee.

7. Each of the parties hereto agree to cooperate and to execute and deliver to the other parties such further instruments, and to take such further actions as may be

reasonably requested by such other parties to evidence and reflect the transactions contemplated by this Agreement.

8. Section 12 of the Purchase Agreement is hereby incorporated by reference, *mutatis mutandis*.
