PATENT ASSIGNMENT

This PATENT ASSIGNMENT (“Assignment”), dated as of June 10, 2021 (the “**Effective Date**”), is entered into between The Scott Fetzer Company, a Delaware corporation (hereinafter the “Seller” or “Assignor”) and Kirby Opco, LLC, a Delaware limited liability company (hereinafter the “Buyer” or “Assignee”). Assignor and Assignee are collectively referred to herein as the “Parties” and each, a “Party.”

WHEREAS, Assignor, is the owner of the U.S. Patents and U.S. Patent Applications set forth in Appendix A and the foreign Patents and foreign Patent Applications set forth in Appendix B (collectively, the “**Assigned Patent Properties**”); and

WHEREAS, Assignee desires to acquire from Assignor, and Assignor has agreed to assign and transfer to Assignee all of Assignor’s entire right, title and interest in, to and under the one or more inventions disclosed, described and claimed or intended so to be in the Assigned Patent Properties, and in, to and under the Assigned Patent Properties, and in, to and under any and all Letters Patent, United States and foreign, which may be obtained therefore and thereon;

NOW, THEREFORE, to all whom it may concern, be it known that for and in consideration of the mutual covenants and agreements hereinafter set forth and other good, valuable and sufficient consideration to Assignor in hand paid, the receipt and sufficiency of which is hereby acknowledged, the Parties hereto agree as follows:

1. Assignor has sold, assigned, transferred, granted and conveyed, and hereby does irrevocably sell, assign, transfer, grant and convey unto Assignee, free and clear of all pledges, security interests, liens, charges, encumbrances, equities, claims, options or limitations of any kind: (i) all of Assignor’s entire worldwide right, title, and interest in, to and under the Assigned Patent Properties, the one or more inventions disclosed, described and claimed or intended so to be in the Assigned Patent Properties, and any and all other applications thereon and arising therefrom, including any and all applications claiming the benefit thereof, and any and all divisions, continuations, and continuations-in-part thereof, and any and all patents to be issued and obtained therefor and thereon, United States and foreign, including all reissues and extensions thereof; (ii) all of Assignor’s rights to sue for infringement thereof, whether arising on, prior to or subsequent to the date of this Assignment; and (iii) any and all Convention and Treaty rights, such as rights of priority; the same to be held and enjoyed by Assignee, its successors and assigns from and after the date hereof as fully and entirely as the same would have been held and enjoyed by Assignor had this Assignment not been made.

2. Assignor hereby authorizes and requests the Honorable Assistant Secretary and Commissioner for Patents and Trademarks and all foreign governmental authorities having authority similar thereto, to issue said Letters Patent to Assignee, its assigns and legal representatives.

3. Assignor agrees to execute, acknowledge and deliver to Assignee, at Assignee’s request, any and all further documents, papers, affidavits, statements and/or other instruments, whether or not in paper or electronic form, to confirm Assignee’s ownership of all rights

pursuant to this Assignment, including for the procurement of Letters Patent on said inventions in the U.S. and all foreign countries for the use of Assignee.

4. Seller hereby covenants that no assignment, sale, agreement or encumbrance has been or will be made or entered into which would conflict with this Assignment.

5. This Assignment may be executed in counterparts, each of which will be deemed an original, but all of which together constitute one and the same original.

6. This Assignment shall be binding upon the successors and assigns of Seller and inure to the benefit of the successors and assigns of Buyer.
