ASSIGNMENT OF PATENTS

Dated May 15, 2020

WHEREAS, Luminara Worldwide, LLC, a Delaware limited liability corporation (“Assignor”), is the owner of the patents and patent applications described on Schedule A-1 hereto (the “Patents”); and

WHEREAS, Assignor has agreed to assign to L&L Candle Company, LLC, a Delaware limited liability company (together with its permitted assignees, the “Assignee”) all of Assignor’s right, title, and interest in and to the Patents.

NOW THEREFORE, in consideration of the premises and the mutual covenants set forth herein and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties agree as follows:

1. Assignor hereby irrevocably sells, assigns and transfers to Assignee, the entire right, title and interest in and to each of the Patents throughout the world, including all continuations, divisions, continuations-in-part, requests for continued examination, reissues, reexaminations, renewals, and extensions thereof; any other filings claiming priority to or serving as a basis for priority thereof; all patents issuing from any of the foregoing; the right to file foreign applications directly in the name of Assignee with respect to the inventions, discoveries or designs described in any of the Patents; the right to claim priority to any of the Patents or any of the inventions, discoveries and designs described in the Patents; and all causes of action and other enforcement rights under, or on account of, any of the foregoing for past, current or future infringement.
2. This Patent Assignment may be filed in all countries of the world. Assignor hereby authorizes the respective patent office or governmental agency in each jurisdiction to issue any and all patents that may be granted upon the applications or other rights assigned hereunder in the name of Assignee, as the assignee to the entire interest therein.
3. This Patent Assignment shall be governed by and construed in accordance with the laws of Delaware without reference to principles of conflicts of law.
4. Assignor hereby represents, warrants and covenants that Assignor has the full power and authority, and have obtained all third party consents, approvals and/or other authorizations required to assign the Patents to Assignee.
5. Assignor hereby represents and covenants that no assignment, sale, agreement or encumbrance has been or will be made or entered into that would conflict with the assignment of the Patents to Assignee.
6. Assignor hereby represents that, at the reasonable request of Assignee and without demanding any further consideration therefor, do all things necessary, proper, or advisable, including without limitation, the execution, acknowledgment, and recordation of specific assignments and other documents on a country-by-country basis, to assist Assignee in obtaining, perfecting, sustaining, and/or enforcing the Patents.

7. No amendment or modification of this assignment shall be valid or binding upon Assignor or Assignee unless made in writing and signed on behalf of each of Assignor and Assignee by their respective duly authorized representative.
